Data tahunan padi merujuk kepada data yang dilaporkan untuk kedua-dua musim, iaitu Musim Utama (termasuk padi huma) dan Luar Musim. Contoh, data untuk tahun 2013 merujuk kepada Musim Utama 2012/2013 dan Luar Musim 2013. Konsep ini digunakan untuk purata hasil padi, keluasan bertanam dan anggaran pengeluaran padi.

Yearly data for paddy refers to data reported in both seasons, i.e., the Main Season (including dryland paddy) and the Off Season. For example, data for 2013 refers to the Main Season 2012/2013 and the Off Season 2013. This concept applies to average yield of paddy, area planted and estimate of paddy production.

However, an additional condition is attached to the Household Expenditure Survey whereby the persons mentioned above are required to stay in the said living quarter for 16 days or more, in the reference period.

Household income

Household income refers to total income accrued to members of a household, both in cash and/or in-kind on a regular basis in one year or more often.

Main source of income

Detailed information on income was obtained from the household members who are income recipients. The main source of income collected include:-

- **Earnings from paid employment** (including wages and salaries, cash allowances, bonuses, commissions, overtime payments, free/concessional food, free/concessional lodging, free/concessional consumer goods and services, payment in-kinds and employer's contributions to EPF/SOCSO);

KEMISKINAN

Konsep kemiskinan yang digunakan adalah berdasarkan kepada kaedah yang telah diperkenalkan pada tahun 2004 iaitu dengan mengambil kira Pendapatan Garis Kemiskinan (PGK) makanan dan PGK bukan makanan bagi setiap isi rumah yang dilawati. PGK ditakrifkan secara berasingan bagi setiap isi rumah dalam PPIR/KA. Setiap PGK ini mengambil kira perkara-perkara berikut:

- Saiz isi rumah dan komposisi demografi

Isi rumah yang mempunyai bilangan ahli yang ramai memerlukan lebih perbelanjaan untuk makanan dan bukan makanan bagi mencapai taraf hidup yang memuaskan untuk semua ahlinya. Oleh kerana keperluan kalori berbeza di antara jantina dan peringkat umur, maka PGK makanan akan berbeza mengikut komposisi demografi isi rumah.

- Lokasi isi rumah: Negeri dan strata (bandar/luar bandar)

Harga bagi makanan dan bukan makanan berbeza secara ketara antara negeri dan antara kawasan bandar dengan luar bandar. Sebagai contoh, harga di Kuala Lumpur biasanya lebih tinggi daripada kawasan lain. PGK baru ini mengambil kira perbezaan harga ini.

Sesebuah isi rumah dalam PPIR/KA dianggap miskin jika pendapatannya kurang daripada PGKnya. Ini bermaksud isi rumah tersebut kekurangan sumber untuk memenuhi keperluan asas makanan dan bukan makanan bagi setiap ahlinya. Sesebuah isi rumah dianggap miskin tegar jika pendapatannya kurang daripada PGK makanannya. PGK bagi setiap isi rumah adalah berbeza mengikut lokasi (negeri dan strata), saiz isi rumah dan komposisi demografi.

- *Other income (including imputed rent of owner-occupied house, rental income from house/other property and rent from lodgings).*

POVERTY

The concept of poverty used is based on the methodology introduced in year 2004 which took into consideration of food Poverty Line Income (PLI) and non-food PLI for each household visited. PLI is defined separately for each household in the HIS/BA. Each household's PLI takes into consideration the following factors:

- *The household's size and demographic composition*

Larger households require more food and non-food expenditures to achieve a satisfactory standard of living for its members. As the caloric requirements vary by sex and age, the food PLI also varies in accordance with the demographic composition of the household.

- *The household's location: State and strata (urban/rural)*

Food and non-food prices vary significantly across states and between urban and rural areas. For example prices in Kuala Lumpur are usually higher than elsewhere. The new PLI takes into account of these price variations.

A household in the Household Income Survey is considered poor if its income is less than its PLI. This means that it lacks the resources to meet the basic food and non-food needs of its individual members. A household is considered hard-core poor if its income is below the food PLI. PLI for each household is different according to the location (state and strata), household size and demographic composition.
