INDIKATOR PERTANIAN TERPILIH

SELECTED AGRICULTURAL INDICATORS

MALAYSIA

2012

JABATAN PERANGKAAN MALAYSIA
DEPARTMENT OF STATISTICS, MALAYSIA

KATA PENGANTAR

Indikator Pertanian Terpilih, Malaysia, 2012 memuatkan maklumat ekonomi, guna tenaga, pengeluaran dan perdagangan luar negeri bagi sektor pertanian merangkumi tanaman, ternakan dan perikanan.

Maklumat dalam penerbitan ini adalah berdasarkan data sekunder yang diperoleh daripada sumber dalaman Jabatan serta agensi berkaitan. Perbandingan di peringkat antarabangsa bagi indikator pengeluaran tanaman, ternakan dan perikanan terpilih juga dipersembahkan bagi melihat kedudukan negara dalam sektor pertanian.

Jabatan merakamkan penghargaan dan terima kasih kepada semua pihak yang terlibat dalam menyumbang kepada penyediaan penerbitan ini. Ulasan dan cadangan untuk menambah baik penerbitan ini pada masa hadapan amatlah dihargai.

PREFACE

Selected Agricultural Indicators, Malaysia, 2012 comprises of information on economy, employment, production and external trade for the agriculture sector include crops, livestock and fisheries.

The information in this publication is based on secondary data obtained internally within the Department and related agencies. International comparison for the production indicators of selected crops, livestock and fisheries are also presented to view the country's position in the agriculture sector.

The Department would like to express its appreciation and gratitude to all parties involved in contributing to this publication. Comments and suggestions towards improving future publications would be greatly appreciated.

RINGKASAN PENEMUAN

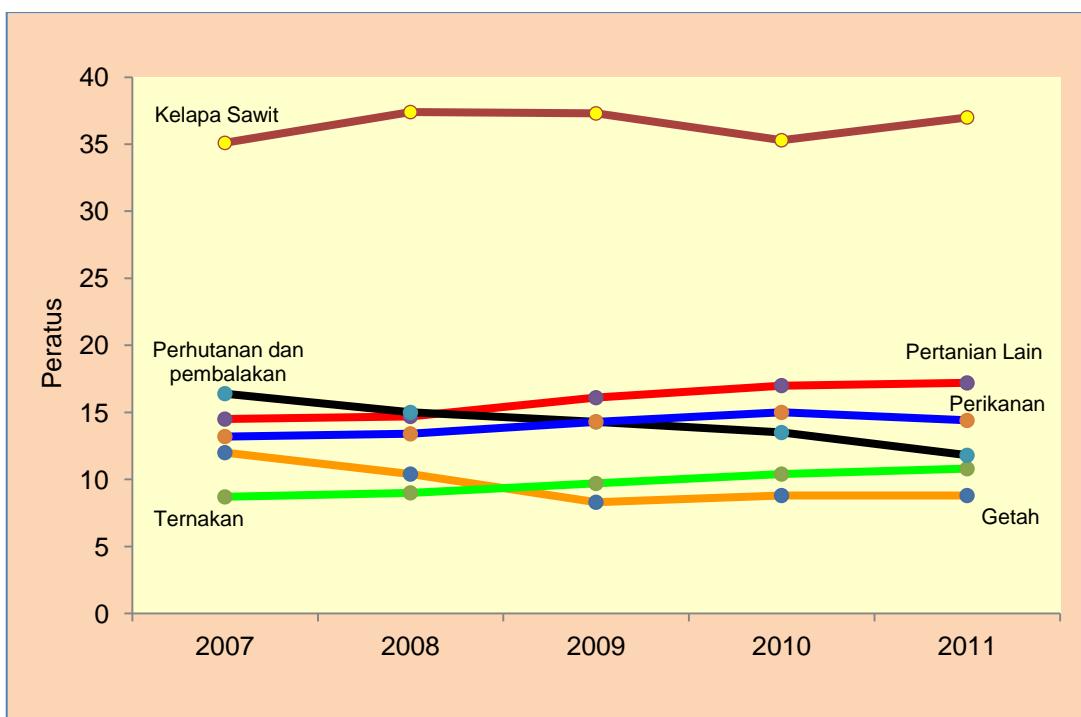

RINGKASAN PENEMUAN

1. Ekonomi Sektor Pertanian

Ekonomi Malaysia mengalami perkembangan pesat yang mana Keluaran Dalam Negeri Kasar (KDNK) sejumlah RM11.8 bilion pada 1970 meningkat kepada RM709.3 bilion pada 2011. Namun begitu, sumbangan sektor pertanian mengalami penurunan dari 28.8 peratus pada 1970 berbanding 7.6 peratus pada 2010 dan meningkat kepada 7.7 peratus pada 2011. Purata sumbangan sektor pertanian kepada KDNK bagi tempoh 2007 hingga 2011 adalah 7.8 peratus.

Pada 2011, kelapa sawit merupakan komoditi utama sektor pertanian dengan sumbangan kepada KDNK adalah 37.0 peratus. KDNK pertanian lain dan perikanan masing-masing mencatatkan 17.2 peratus dan 14.4 peratus.

Carta 1: Pembahagian peratusan KDNK sektor pertanian pada harga malar 2005, Malaysia, 2007-2011

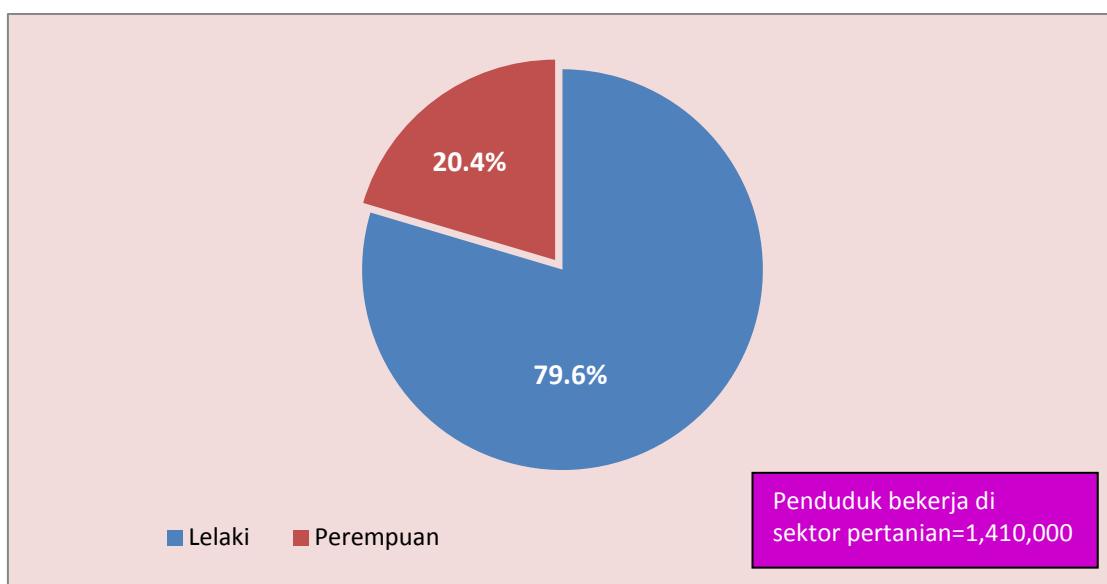

Pada 2011, sumbangan sektor pertanian kepada KDNK bagi Hong Kong, Korea Selatan dan Taiwan adalah di antara 0.1 peratus hingga 2.6 peratus. Sektor pertanian juga masih menjadi sektor penting dan menyumbang peratusan yang tinggi kepada KDNK bagi Filipina (11.5%), Indonesia (12.7%) dan Thailand (8.6%).

2. Guna Tenaga Sektor Pertanian

Pada 2011, penduduk bekerja di sektor pertanian berkurangan kepada 11.5 peratus daripada 13.6 peratus pada 2010. Penduduk lelaki bekerja mencatatkan peratusan lebih tinggi (79.6%) daripada penduduk perempuan bekerja (20.4%).

Carta 2: Taburan peratus penduduk bekerja di sektor pertanian, Malaysia, 2011

Bilangan pekerja asing dalam sektor pertanian dan perladangan bagi tempoh 2007 hingga 2011 adalah di antara 24.6 peratus hingga 28.7 peratus daripada keseluruhan pekerja asing di Malaysia. Pada 2011, bilangan pekerja asing dalam sektor ini berkurangan kepada 451,542 orang (9.3%) berbanding tahun sebelumnya.

3. Pengeluaran

3.1 Subsektor Tanaman

Tanaman merupakan subsektor utama dalam sektor pertanian. Produk kelapa sawit iaitu minyak sawit mentah dan isirong sawit adalah produk utama subsektor ini. Pengeluaran minyak sawit mentah dan isirong sawit masing-masing meningkat sebanyak 1,917.8 ribu tan metrik dan 414.5 ribu tan metrik pada 2011 berbanding tahun sebelumnya.

Pada 2010, Malaysia berada di kedudukan kedua dalam pengeluaran minyak sawit mentah dan isirong sawit dunia selepas Indonesia.

Pengeluaran getah asli pada 2011 meningkat kepada 996.2 ribu tan metrik (6.1%) berbanding tahun sebelumnya. Pada 2010, pengeluaran getah asli Malaysia masih kekal di kedudukan ketiga dunia sama seperti pada 2009.

Pengeluaran padi meningkat kepada 2,665.0 ribu tan metrik (8.2%) pada 2011 berbanding tahun sebelumnya. Pengeluaran bagi semua negara pengeluar padi *Association of Southeast Asian Nations* (ASEAN) meningkat pada 2011 kecuali Indonesia dan Myanmar.

Pengeluaran biji koko pula menyusut lebih tiga perempat kepada 4.6 ribu tan metrik pada 2011 berbanding 35.2 ribu tan metrik pada 2007. Pengeluaran herba dan bunga-bungaan meningkat tiga kali ganda pada 2011 berbanding 2007.

Malaysia berada di kedudukan yang keenam bagi pengeluaran lada, manakala kelapa dan nanas masing-masing berada di kedudukan ke-10 dan ke-11 dunia pada 2010.

3.2 Subsektor Ternakan

Pada 2011, semua pengeluaran produk ternakan meningkat kecuali daging babi iaitu daging lembu/kerbau (5.0%), daging kambing/bebiri (12.5%), daging ayam/itik (3.0%), telur ayam/itik (5.3%) dan susu (5.8%) berbanding 2010.

Perbandingan antarabangsa pada 2010 menunjukkan pengeluaran daging itik berada di kedudukan kedua dan daging ayam di kedudukan ketujuh di Asia. Pengeluaran bagi telur burung lain-lain berkulit berada di kedudukan kelapan dan pengeluaran telur ayam serta daging babi masing-masing berada di kedudukan ke-10.

Pada 2011, sembelihan ternakan tertinggi yang direkod tertumpu kepada dua negeri iaitu kerbau di Perak (21.3%) manakala lembu, kambing, bebiri dan babi di Selangor masing-masing sebanyak 29.8 peratus, 72.2 peratus, 66.4 peratus dan 31.6 peratus.

3.3 Subsektor Perikanan

Pada 2011, pendaratan ikan laut berkurangan kepada 1,373.1 ribu tan metrik (3.9%) berbanding tahun sebelumnya. Perak mencatatkan peratusan pendaratan ikan laut tertinggi iaitu 22.0 peratus, diikuti Sabah (12.9%) dan Perlis (9.8%).

Perbandingan antarabangsa pada 2010 bagi pengeluaran tangkapan ikan menunjukkan Malaysia berada di kedudukan ke-17 dunia dan ke-11 di Asia.

Sepanjang 2007 hingga 2011, purata pertumbuhan tahunan bagi pengeluaran akuakultur air tawar adalah 14.9 peratus manakala 19.5 peratus bagi akuakultur air payau/marin.

Pada 2011, Perak merupakan pengeluar terbesar akuakultur air tawar iaitu 53.6 ribu tan metrik, diikuti Selangor dan Johor masing-masing mencatat pengeluaran 14.4 ribu tan metrik dan 10.6 ribu tan metrik. Sementara itu, Sabah menyumbang pengeluaran tertinggi bagi pengeluaran akuakultur air payau/marin iaitu 256.5 ribu tan metrik.

Malaysia berada di kedudukan ke-16 di peringkat dunia dan ke-11 di Asia bagi pengeluaran tertinggi akuakultur pada 2010. Pengeluaran ikan hiasan menurun daripada 446 juta ekor pada 2007 kepada 308 juta ekor pada 2011. Johor merupakan penyumbang utama ikan hiasan dengan mencatatkan pengeluaran 236 juta ekor (RM235.4 juta).

4. Keluasan Bertanam

Bagi tempoh 2007 hingga 2011, keluasan bertanam kelapa sawit meningkat dengan purata pertumbuhan tahunan 3.8 peratus daripada 4.3 juta hektar kepada 5.0 juta hektar. Penanaman secara estet meliputi 86.0 peratus hingga 89.1 peratus daripada keseluruhan kawasan bertanam kelapa sawit.

Pada 2011, keluasan bertanam getah berkurangan sebanyak 0.2 ribu hektar kepada 1,010.7 ribu hektar berbanding 2010. Sebaliknya, bagi koko meningkat sebanyak 0.4 ribu hektar.

Keluasan bertanam bagi tembakau, herba dan rempah-ratus masing-masing meningkat sebanyak 13.5 peratus, 16.7 peratus dan 4.1 peratus pada 2011 berbanding 2010.

5. Bilangan Ternakan

Pada 2011, ternakan bagi bebiri, ayam dan itik masing-masing meningkat sebanyak 2.4 peratus, 6.5 peratus dan 8.6 peratus berbanding 2010.

Bagi bebiri, Kelantan mencatatkan bilangan ternakan bebiri tertinggi iaitu 31,350 (24.8%). Sementara itu, ternakan ayam merekodkan bilangan ternakan tertinggi di Johor iaitu 60,265,213 (26.1%). Perak mencatatkan ternakan itik tertinggi dengan 5,553,200 (60.2%).

6. Kadar Sara Diri

Kadar sara diri merujuk kepada sejauh mana bekalan domestik dapat memenuhi keperluan penduduk. Pada 2010, pengeluaran kelapa meningkat pada kadar 45.1 peratus tetapi tidak mencukupi untuk menampung keperluan domestik kerana kadar sara diri masih di bawah paras 100 peratus iaitu 92.2 peratus. Manakala pengeluaran bagi nanas, pisang, tembakai, durian dan cempedak/nangka mengekalkan kadar sara diri melebihi 100 peratus bagi tempoh 2006 hingga 2010.

Pada 2010, pengeluaran tomato, timun, sawi, terung, kacang panjang, bendi dan bayam merupakan tujuh daripada sembilan komoditi sayur-sayuran terpilih yang menyumbang kepada bekalan domestik yang mencukupi. Bagi komoditi hasil ternakan terpilih, hanya telur ayam/itik mencatatkan kadar sara diri melebihi 100 peratus pada tempoh 2006 hingga 2010.

7. Pengeluaran Industri Asas Tani

Secara keseluruhan Indeks Pengeluaran Perindustrian (IPP) pembuatan yang berdasarkan tahun 2005 meningkat setiap tahun kecuali 2009 bagi tempoh 2007 hingga 2011 dengan catatan tertinggi iaitu 117.3 pada 2011. Bagi tempoh 2007 hingga 2011, IPP minyak kelapa sawit bertapis dan pengilangan padi menunjukkan trend meningkat setiap tahun. Produk tembakau mencatatkan IPP kurang daripada 100. Pada 2011, IPP roti, kek dan produk bakeri lain adalah tertinggi iaitu 244.3.

8. Harga bagi Subkumpulan Makanan dan Minuman Bukan Alkohol

Indeks Harga Pengguna (IHP) yang berasaskan tahun 2010 bagi semua subkumpulan makanan dan minuman bukan alkohol meningkat setiap tahun bagi tempoh 2007 hingga 2011. Walau bagaimanapun, IHP minyak dan lemak berkurangan 0.2 peratus pada 2010. Pada 2011, perubahan peratus IHP meningkat bagi semua subkumpulan makanan dan minuman bukan alkohol kecuali sayur-sayuran iaitu 5.3 peratus berbanding 7.8 peratus pada 2010.

9. Perdagangan Luar Negeri Sektor Pertanian

Bagi tempoh 2007 hingga 2011, purata pertumbuhan tahunan bagi jumlah import dan jumlah eksport sektor pertanian masing-masing adalah 13.2 peratus dan 12.0 peratus. Imbangan perdagangan sektor pertanian menunjukkan peningkatan daripada RM37.8 bilion pada 2007 kepada RM56.3 bilion pada 2011.

10. Perbelanjaan Bulanan Purata Isi Rumah

Pada 2009/2010, perbelanjaan bulanan purata isi rumah adalah RM2,190. Perbelanjaan purata yang tertinggi ialah bagi kumpulan perbelanjaan perumahan, air, elektrik, gas dan bahan api lain iaitu RM495 (22.6%), diikuti oleh kumpulan makanan dan minuman bukan alkohol sebanyak RM444 (20.3%).

Pada 2009/2010, bagi kumpulan perbelanjaan makanan dan minuman bukan alkohol, perbelanjaan purata roti & bijirin lain, daging dan ikan & makanan laut masing-masing mencatatkan RM53 (11.9%), RM64 (14.4%) dan RM98 (22.1%).

SUMMARY FINDINGS

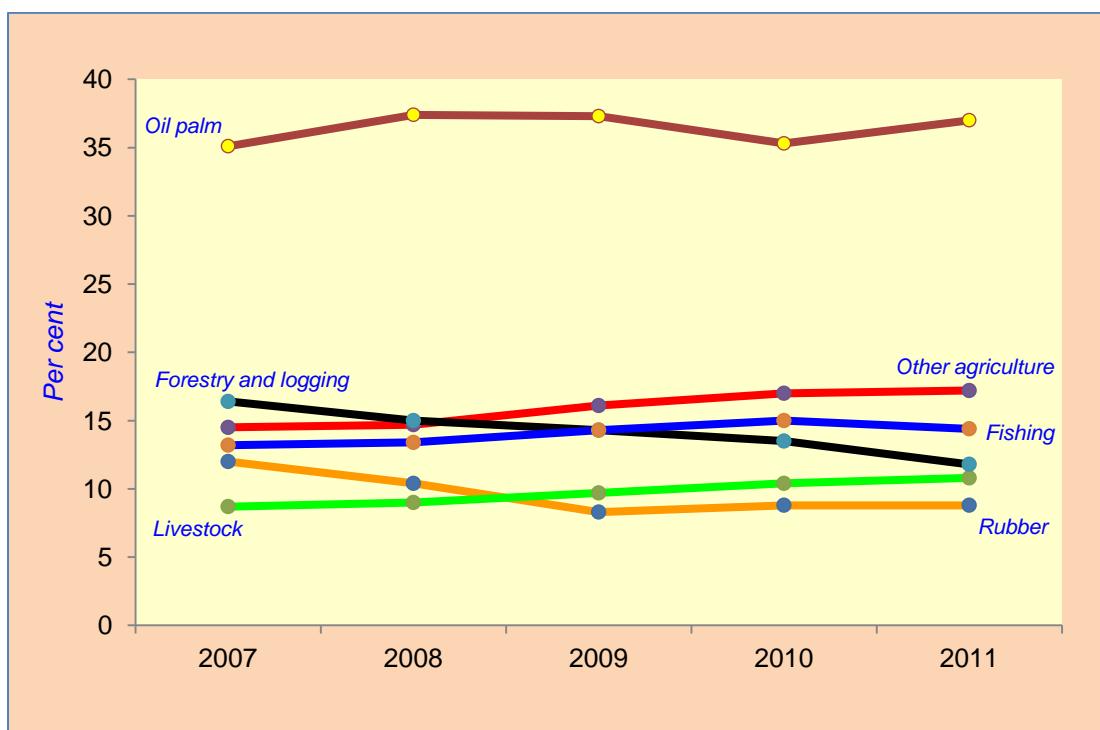

SUMMARY FINDINGS

1. The Economy of the Agriculture Sector

The Malaysian economy experienced a rapid growth where the Gross Domestic Product (GDP) which was RM11.8 billion in 1970 increased to RM709.3 billion in 2011. However, the contribution of the agriculture sector declined from 28.8 per cent in 1970 as compared to 7.6 per cent in 2010 and rose to 7.7 per cent in 2011. The average contribution of agriculture sector to GDP was 7.8 per cent for the period 2007 to 2011.

In 2011, oil palm was the main commodity in agriculture sector, contributed 37.0 per cent to GDP. GDP for other agriculture and fishing recorded 17.2 per cent and 14.4 per cent respectively.

Chart 1: Percentage share of GDP for agriculture sector at constant 2005 prices, Malaysia, 2007-2011

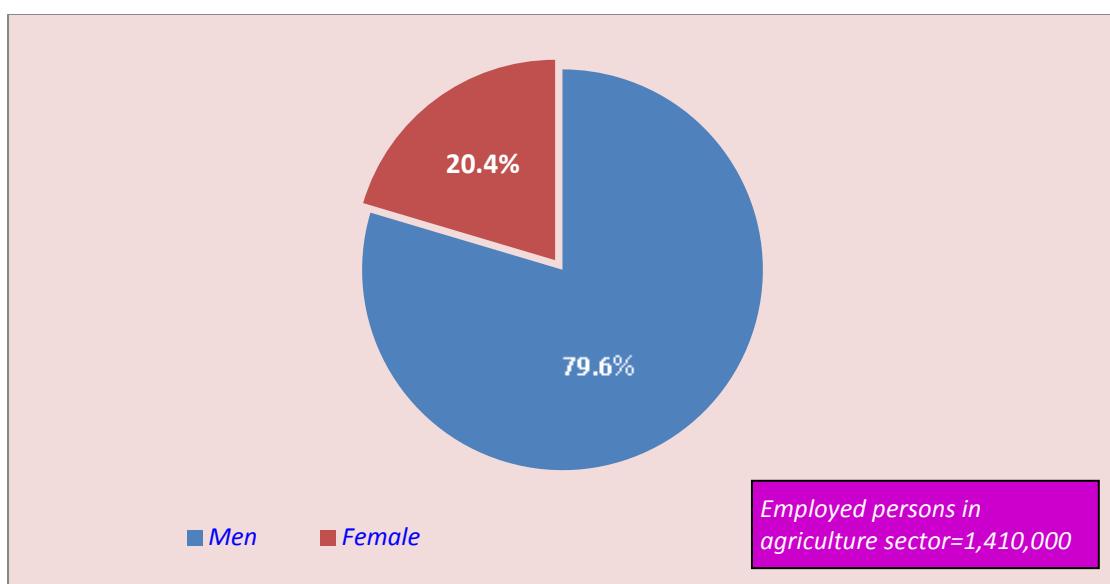

In 2011, contribution of agriculture to GDP for Hong Kong, South Korea and Taiwan is between 0.1 per cent and 2.6 per cent. Agriculture sector still remains as an important sector and strongly contributed to GDP for Philippines (11.5%), Indonesia (12.7%) and Thailand (8.6%).

2. Employment in the Agriculture Sector

In 2011, the employed persons in agriculture sector decreased to 11.5 per cent from 13.6 per cent in 2010. The employed male recorded percentage higher (79.6%) than the female (20.4%).

Chart 2: Percentage distribution of employed persons in agriculture sector, Malaysia, 2011

The number of foreign workers in the agriculture and plantation sector for the period of 2007 to 2011 ranged between 24.6 per cent to 28.7 per cent of the total number of foreign workers in Malaysia. In 2011, the number of foreign workers decreased to 451,542 persons (9.3%) as compared to the previous year.

3. Production

3.1 Crops sub-sector

Crops was the main sub-sector in the agriculture sector. Oil palm products such as crude palm oil and palm kernel were the main products for the sub-sector. Production of crude palm oil and palm kernel increased by 1,917.8 thousand tonnes and 414.5 thousand tonnes respectively in 2011 as compared to the previous year.

In 2010, Malaysia was placed as the world's second highest producer of crude palm oil and palm kernel after Indonesia.

Natural rubber production in 2011 rose to 996.2 thousand tonnes (6.1%) as compared to the previous year. In 2010, Malaysia's natural rubber production remained third in the world, similar to 2009.

The production of paddy increased to 2,665.0 thousand tonnes (8.2%) in 2011 as compared to the previous year. Production of all Association of Southeast Asian Nations (ASEAN) paddy-producing countries have increased in 2011 except Indonesia and Myanmar.

Production of cocoa beans decreased by more than three quarter to 4.6 thousand tonnes in 2011 compared to 35.2 thousand tonnes in 2007. Production of herbs and flowers rose three times in 2011 compared to 2007.

In 2010, production of pepper in Malaysia was ranked sixth in the world, while coconut and pineapple was ranked 10th and 11th respectively.

3.2 Livestock sub-sector

In 2011, all livestock production increased except pork i.e. beef (5.0%), mutton (12.5%), poultry meat (3.0%), chicken/duck eggs (5.3%) and milk (5.8%) as compared to 2010.

International comparison in 2010 showed that the production of duck and chicken meat were ranked second and seventh respectively among Asia countries. Meanwhile, production of other birds' eggs in shell was ranked eight and both production of hen eggs and pork were ranked tenth.

In 2011, the highest recorded slaughter were focused in two states, namely buffalo in Perak (21.3%), while cattle, goat, sheep and swine in Selangor was 29.8 per cent, 72.2 per cent, 66.4 per cent and 31.6 per cent respectively.

3.3 Fisheries sub-sector

In 2011, marine fish landings decreased to 1,373.1 thousand tonnes (3.9%) as compared to the previous year. Perak recorded the highest marine fish landings i.e. 22.0 per cent, followed by Sabah (12.9%) and Perlis (9.8%).

International comparison in 2010 for production of fish capture showed Malaysia is ranked 17th in the world and 11th in Asia.

The average annual growth for freshwater aquaculture production from 2007 to 2011 was 14.9 per cent whilst 19.5 per cent for brackishwater/marine aquaculture.

In 2011, Perak was the largest producer of freshwater aquaculture with 53.6 thousand tonnes, followed by Selangor and Johor

i.e. 14.4 thousand tonnes and 10.6 thousand tonnes respectively. Meanwhile, Sabah contributed the highest production for brackishwater/marine aquaculture i.e. 256.5 thousand tonnes.

Malaysia is ranked the 16th in the world and 11th in Asia for the top aquaculture production in 2010. Production of ornamental fish declined from 446 million pieces in 2007 to 308 million pieces in 2011. Johor was the main contributor to the ornamental fish production which recorded 236 million pieces (RM235.4 million).

4. Planted Area

For the period of 2007 to 2011, the planted area for oil palm increased with an average annual growth of 3.8 per cent from 4.3 million hectares to 5.0 million hectares. Estate cultivation covered 86.0 per cent to 89.1 per cent of the total planted area of oil palm.

In 2011, planted area for rubber decreased by 0.2 thousand hectares to 1,010.7 thousand hectares as compared to 2010. On the other hand, planted area for cocoa increased by 0.4 thousand hectares.

The planted area for tobacco, herbs and spices increased by 13.5 per cent, 16.7 per cent and 4.1 per cent respectively in 2011 as compared to 2010 .

5. Number of Livestock

In 2011, the number of sheep, chicken and duck increased by 2.4 per cent, 6.5 per cent and 8.6 per cent as compared to 2010. Kelantan recorded the highest number of sheep i.e. 31,350 (24.8%). Meanwhile, chicken had the highest recorded number of livestock in Johor i.e. 60,265,213 (26.1%). Perak recorded the highest duck with 5,553,200 (60.2%).

6. Self-sufficiency ratio (SSR)

SSR refers to the extent of which domestic supply is able to meet the population requirement. In 2010, the production of coconut grew at 45.1 per cent, but insufficient to meet the domestic need as the SSR ratio was 92.2 per cent. Whereas production of pineapple, banana, watermelon, durian and jackfruit sustained SSR more than 100 per cent for the period 2006 to 2010.

In 2010, the production of tomato, cucumber, mustard, brinjal, long beans, lady's finger and spinach was seven out of nine selected vegetables that contributed to an adequate domestic supply. For the selected livestock commodities, only chicken/duck eggs recorded SSR more than 100 per cent for the period 2006 to 2010.

7. Production of Agro-based Industries

In overall, the Industrial Production Index (IPI) of manufacturing with 2005 as the base year increased every year for the period 2007 to 2011 except 2009. The highest IPI was recorded in 2011 at 117.3. For the period 2007 to 2011, IPI of refined palm oil and rice milling showed increasing trend every year. Product of tobacco is the only industry which recorded IPI less than 100. In 2011, the IPI for bread, cake and other bakery products was the highest i.e. 244.3.

8. Prices for Sub-Groups of Food and Non-Alcoholic Beverages

Consumer Price Index (CPI) for the base year 2010 for all sub-groups of food and non-alcoholic beverages rose every year for the period 2007 to 2011. However, CPI for oils and fats declined 0.2 per cent in 2010. In 2011, the percentage change in the CPI increased for all sub-groups of food and non-alcoholic beverages except vegetables at 5.3 per cent compared to 7.8 per cent in 2010.

9. External Trade for Agriculture Sector

For the period 2007 to 2011, the average annual growth for total imports and total exports of agricultural sector was 13.2 per cent and 12.0 per cent respectively. Balance of trade for agriculture sector showed an increase from RM37.8 billion in 2007 to RM56.3 billion in 2011.

10. Average Monthly Expenditure for Household

In 2009/2010, the average monthly household expenditure was RM2,190. The highest average expenditure group was for housing, water, electricity, gas and other fuels group at RM495 (22.6%), followed by food and non-alcoholic beverages amounted to RM444 (20.3%).

In 2009/2010, for food and non-alcoholic beverages expenditure group, average expenditure for bread & other cereals, meat and fish & seafood recorded RM53 (11.9%), RM64 (14.4%) and RM98 (22.1%) respectively.

NOTA TEKNIKAL

NOTA TEKNIKAL

1. Indikator Pertanian

- 1.1 Indikator pertanian merujuk kepada parameter kuantitatif bagi variabel yang dapat memberikan penilaian ringkas mengenai pengukuran atau status maklumat perangkaan pertanian. Indikator ini juga merupakan ciri-ciri atau kriteria relevan yang dapat mengurangkan keraguan kepada sesuatu penilaian yang dibuat (*reliability*).
- 1.2 Di antara parameter yang terlibat dalam indikator pertanian adalah Keluaran Dalam Negeri Kasar (KDNK), guna tenaga, pengeluaran, keluasan bertanam, harga dan perdagangan luar negeri.

2. Akaun Negara

- 2.1 Maklumat KDNK adalah berdasarkan konsep dan metodologi yang terdapat dalam *System of National Accounts*, 1993 (SNA 1993) daripada Pertubuhan Bangsa-Bangsa Bersatu.
- 2.2 KDNK pada harga malar adalah mengikut tahun asas yang berlainan. Tahun asas tersebut ialah 1970, 1978, 1987, 2000 dan 2005.
- 2.3 Pengasasan semula tahun asas dilakukan bagi memastikan data Akaun Negara menggambarkan perubahan struktur ekonomi dan perubahan harga relatif yang lebih tepat. Ini membolehkan data pada harga malar dirujuk kepada harga asas yang terkini. Struktur harga dan wajaran terbaru dapat memberikan ukuran yang lebih tepat kepada perubahan aggregat dari segi nilai dalam KDNK dan petunjuk-petunjuk makroekonomi yang lain.

3. Guna tenaga

- 3.1 Data penduduk bekerja diperoleh daripada Penyiasatan Tenaga Buruh. Tenaga Buruh merujuk kepada mereka yang berumur 15 hingga 64 tahun (dalam tahun genap pada hari lahir terakhir) semasa minggu rujukan, sama ada bekerja atau menganggur.
- 3.2 Penduduk bekerja merujuk kepada semua orang yang bekerja sekurang-kurangnya sejam semasa minggu rujukan untuk mendapatkan upah, keuntungan atau keuntungan keluarga (sebagai majikan, pekerja, bekerja sendiri atau pekerja keluarga tanpa gaji).

4. Pengeluaran sektor pertanian dan keluasan bertanam

- 4.1 Data pengeluaran bagi tanaman, ternakan dan perikanan serta keluasan bertanam diperoleh daripada Kementerian Pertanian dan Asas Tani kecuali bagi kelapa sawit yang diperoleh daripada Lembaga Minyak Sawit Malaysia. Data getah diperoleh daripada penerbitan Perangkaan Getah Tahunan.
- 4.2 Keluasan bertanam merujuk kepada keluasan yang ditanam sama ada matang dan/atau belum matang.
- 4.3 Sembelihan ternakan yang direkod merujuk kepada bilangan ternakan yang dilaporkan oleh individu yang memohon permit daripada setiap Jabatan Perkhidmatan Veterinar (DVS) Negeri untuk melakukan sembelihan. Termasuk juga jumlah sembelihan di bawah rumah sembelihan seliaan jabatan. Data bilangan ternakan diperoleh daripada DVS.

4.4 Akuakultur adalah pembiakan benih ikan atau pemeliharaan biak ikan melalui perusahaan ternak keseluruhan atau sebahagian daripada peredaran hidupnya. Akuakultur terdiri daripada akuakultur air tawar dan air payau/masin.

5. Indeks Pengeluaran Perindustrian (2005=100)

5.1 Indeks Pengeluaran Perindustrian (IPP) bertujuan untuk mengukur kadar perubahan sebenar dalam pengeluaran komoditi bagi satu tempoh masa.

5.2 Penerbitan ini memaparkan IPP bagi pembuatan makanan terpilih berdasarkan tanaman, ternakan dan perikanan.

5.3 Konsep dan definisi yang diguna adalah berdasarkan "Piawaian Klasifikasi Industri Malaysia (MSIC) 2000" yang selaras dengan *International Standard Industrial Classification of All Economic Activities (ISIC) Rev.3*.

6. Indeks Harga Pengguna (2010=100)

6.1 Indeks Harga Pengguna (IHP) mengukur perubahan peratus kos pembelian mengikut masa bagi "bakul" tetap barang dan perkhidmatan yang mewakili corak purata pembelian oleh sekumpulan penduduk pada sesuatu tempoh masa yang ditetapkan.

6.2 "Bakul" ini merujuk kepada barang dan perkhidmatan yang mempunyai kualiti dan kuantiti yang seakan-akan sama atau tidak berubah, mengandungi item yang berada lama atau boleh diukur secara berterusan di pasaran berbanding dengan masa.

- 6.3 Perubahan harga barang yang berlaku dalam bakul ini adalah disebabkan oleh perubahan harga yang sebenarnya sahaja, iaitu perubahan harga ini tidak berkaitan langsung dengan perubahan pada kuantiti atau kualiti barang dan perkhidmatan tersebut.
- 6.4 Barang dan perkhidmatan yang diliputi dalam “bakul” ini adalah luas, dikelaskan berpandu kepada *United Nations “Classification of Individual Consumption According to Purpose (COICOP)”* dalam 12 kumpulan berikut:
- Makanan dan Minuman Bukan Beralkohol
 - Minuman Beralkohol dan Tembakau
 - Pakaian dan Kasut
 - Perumahan, Air, Elektrik, Gas dan Bahan Api Lain
 - Hiasan, Perkakasan dan Penyelenggaraan Isi Rumah
 - Kesihatan
 - Pengangkutan
 - Komunikasi
 - Perkhidmatan Rekreasi dan Kebudayaan
 - Pendidikan
 - Restoran dan Hotel
 - Pelbagai Barang dan Perkhidmatan

7. Perdagangan Luar Negeri

- 7.1 Malaysia menggunakan ‘sistem umum’ dalam menyusun perangkaan perdagangan luar negerinya. Di bawah sistem ini, sempadan negara digunakan sebagai sempadan perangkaan. Semua barang yang dibawa masuk atau keluar dari negara direkodkan, sama ada barang itu tertakluk kepada kelulusan tertentu atau pun tidak. Barang yang dibawa masuk atau keluar dari gudang gudang simpanan kastam, Zon Perdagangan Bebas dan Zon Bebas direkodkan di dalam perangkaan ini.

- 7.2 Barang dagangan dikelaskan mengikut Piawaian Klasifikasi Perdagangan Antarabangsa, Pindaan Keempat daripada Pertubuhan Bangsa-bangsa Bersatu.

8. Perbelanjaan penggunaan isi rumah

Perbelanjaan penggunaan isi rumah adalah segala perbelanjaan untuk kegunaan persendirian ke atas barang dan perkhidmatan sepanjang tempoh rujukan. Definisi perbelanjaan penggunaan isi rumah yang diguna pakai dalam Penyiasatan Perbelanjaan Isi Rumah pada asasnya mengikut syor Pertubuhan Bangsa-bangsa Bersatu menerusi penerbitan SNA 1993, *Series F, Number 2 Rev. 4.*

9. Kadar sara diri

- 9.1 Kadar sara diri menerangkan tentang magnitud pengeluaran terhadap penggunaan domestik. Ia menunjukkan setakat mana bekalan domestik dalam negara dihasilkan daripada pengeluaran domestik.
- 9.2 Kadar sara diri yang kurang daripada 100 peratus menunjukkan pengeluaran tidak mencukupi untuk memenuhi keperluan domestik. Manakala kadar yang melebihi 100 peratus pula, pengeluaran adalah mencukupi untuk memenuhi keperluan domestik.

10. Pembundaran

Jumlah bagi komponen mungkin berbeza dengan jumlah besar dalam jadual penerbitan disebabkan oleh pembundaran angka.

11. Pengiraan purata pertumbuhan tahunan

Pengiraan purata pertumbuhan tahunan (r) adalah berdasarkan formula berikut:

$$Y_t = Y_o (1 + r)^t$$

Di mana r ,

$$r = e^{\frac{1}{t} \ln \left(\frac{y_t}{y_o} \right)} - 1 \times 100$$

Di mana,

Y_t = Nilai pada tahun semasa

Y_o = Nilai pada tahun sebelum

t = Bilangan tahun, $Y_t - Y_o$

r = Purata pertumbuhan tahunan

12. Simbol dan huruf ringkas

Simbol dan huruf ringkas berikut digunakan dalam penerbitan ini:

t.t.m.m	tidak terkelas di mana-mana
t.t.t.l	tidak terkelas di tempat lain
Kg	kilogram
RM	Ringgit Malaysia
e	anggaran
p	permulaan
r	pindaan

TECHNICAL NOTES

TECHNICAL NOTES

1. Agricultural Indicators

- 1.1 *Agricultural indicators refer to the quantitative parameter of the variable that is able to give a brief assessment about the measurement on the status of the information on agricultural statistics. It is also an important and relevant characteristic or criteria that could reduce uncertainty on the assessment made on its reliability.*
- 1.2 *Among the parameters related to the agricultural indicators are Gross Domestic Product (GDP), employment, production, planted area, prices and external trade.*

2. National Accounts

- 2.1 *The compilation of GDP in Malaysia is currently based on the concepts and methodology outlined in the “System of National Accounts, 1993” (SNA 1993) of the United Nations.*
- 2.2 *GDP at constant price is based on different base years. The base years are 1970, 1978, 1987, 2000 and 2005.*
- 2.3 *The rebasing exercise ensures that National Accounts data reflects accurate structural changes in the economy as well as changes in relative prices. Therefore, constant prices are derived by using the price of a more recent year. The latest price structure and weightage provide more accurate measurement to the aggregate changes in term of GDP value as well as other macroeconomic indicators.*

3. Employment

- 3.1 *Data of labour force obtained from the Labour Force Survey. Labour force refers to those who during the reference week, are in the 15 to 64 years age group (in completed years at last birthday) and who are either employed or unemployed.*
- 3.2 *Employed workers refer to all persons who, at any time during the reference week worked at least one hour for pay, profit or family gain (as an employer, employee, own-account worker or unpaid family worker).*

4. Production and Planted areas

- 4.1 *Data for the production of crops, livestock and fisheries as well as planted area is obtained from the Ministry of Agriculture and Agro-based Industries except for palm oil is obtained from the Malaysian Palm Oil Board. Data for rubber is obtained from the publication of Annual Rubber Statistics.*
- 4.2 *Planted area refers to the area which is either mature and/or immature.*
- 4.3 *Recorded slaughter of livestock refers to the number of livestock reported by individual who have applied permits from State Department of Veterinary Services (DVS) for slaughtering activities. It also includes total number of slaughtered livestock from slaughtered house under the supervision of the department. Number of livestock is also obtained from DVS.*
- 4.4 *Aquaculture is the propagation of fish seed or the raising of fish through husbandry during the whole or part of its life cycle. Aquaculture consists of freshwater aquaculture and brackishwater/marine aquaculture.*

5. Index of Industrial Production (2005=100)

- 5.1 *The Index of Industrial Production (IPP) is to measure the rate of change in the production of industrial commodities in real terms over time.*
- 5.2 *The publication highlights the IPP for selected food-related agro-based industries of crops, livestock and fisheries.*
- 5.3 *Concepts and definitions used were based on Malaysia Standard Industrial Classification (MSIC) 2000 which adhere to that of the International Standard Industrial Classification of All Economic Activities (ISIC), Rev.3.*

6. Consumer Price Index (2010=100)

- 6.1 *The Consumer Price Index (CPI) measures the percentage change through time in the cost of purchasing a constant “basket” of goods and services representing the average pattern of purchases made by a particular population group in a specified time period.*
- 6.2 *The “basket” is of an unchanging or equivalent quantity and quality of goods and services, consisting of items for which there are continually measurable market prices over time.*
- 6.3 *Changes in the costs of items in the basket are therefore due only to pure price movements, i.e. price movements that are not associated with changes in the quality and/or quantity of the set of consumer goods and services in the basket.*
- 6.4 *This “basket” covers a wide range of goods and services, classified according to the United Nations “Classification of Individual Consumption According to Purpose (COICOP)” in the following 12 groups:*

- *Food and Non-alcoholic Beverages*
- *Alcoholic Beverages and Tobacco*
- *Clothing and Footwear*
- *Housing, Water, Electricity, Gas and Other Fuels*
- *Furnishings, Household Equipment and Routine Household Maintenance*
- *Health*
- *Transport*
- *Communication*
- *Recreation Services and Culture*
- *Education*
- *Restaurants and Hotels*
- *Miscellaneous Goods and Service*

7. External Trade

- 7.1 *The general system of recording is adopted in compiling Malaysian external trade statistics. Under this system, the national boundary of the country is used as the statistical frontier. All goods entering or leaving the country are recorded, whether or not such goods are subject to clearance. Accordingly, goods entering or leaving customs bonded warehouses, Free Trade Zones and Free Zones are recorded in the statistics.*
- 7.2 *Commodities are classified according to the Standard International Trade Classification, Revision 4 (S.I.T.C. Rev. 4) of the United Nations.*

8. Household consumption expenditure

Household consumption expenditure is the expenditure incurred by private households on consumption of goods and services during the reference period. The definition of household consumption expenditure used in the Household Expenditure Survey basically refers to the recommendations of the United Nations as published in the SNA 1993, Series F, Number 2 Rev. 4.

9. Self-sufficiency ratio (SSR)

- 9.1 *Self-sufficiency ratio (SSR) expresses the magnitude of production in relation to domestic utilization. It is the extent to which a country's supply of commodities is derived from its own domestic production.*
- 9.2 *SSR of less than 100 per cent indicates inadequacy of production to cope with the demand of the domestic requirements, whilst ratio of greater than 100 per cent indicates that domestic production is more than enough to support the domestic requirements.*

10. Rounding

The sum of components may not add up to the totals in the tables presented in this publication due to rounding.

11. Calculating average annual growth

The average annual growth (r) in the value of a variable over the period of a year based on:

$$Y_t = Y_o (1 + r)^t$$

Solving for r ,

$$r = e^{\frac{1}{t}} \left[\frac{y_t}{y_o} \right] - 1 \times 100$$

Where,

Y_t = Value at current year

Y_o = Value at previous year

t = Number of years, $Y_t - Y_o$

r = Average annual growth

12. Symbols and notations

The following symbols and notations have been used throughout the publications:

<i>n.e.c</i>	<i>not elsewhere classified</i>
<i>Kg</i>	<i>kilogramme</i>
<i>RM</i>	<i>Ringgit Malaysia</i>
<i>e</i>	<i>estimate</i>
