INDIKATOR PERTANIAN TERPILIH

SELECTED AGRICULTURAL INDICATORS

MALAYSIA

2013

JABATAN PERANGKAAN MALAYSIA
DEPARTMENT OF STATISTICS, MALAYSIA

KATA PENGANTAR

Indikator Pertanian Terpilih, Malaysia, 2013 memuatkan maklumat ekonomi, guna tenaga, pengeluaran dan perdagangan luar negeri bagi sektor pertanian merangkumi tanaman, ternakan dan perikanan.

Maklumat dalam penerbitan ini adalah berdasarkan data sekunder yang diperoleh daripada sumber dalaman Jabatan serta agensi berkaitan. Perbandingan di peringkat antarabangsa bagi indikator pengeluaran tanaman, ternakan dan perikanan terpilih juga dipersembahkan bagi melihat kedudukan negara dalam sektor pertanian.

Jabatan merakamkan penghargaan dan terima kasih kepada semua pihak yang terlibat dalam menyumbang kepada penyediaan penerbitan ini. Ulasan dan cadangan untuk menambah baik penerbitan ini pada masa hadapan amatlah dihargai.

DR. HAJI ABDUL RAHMAN BIN HASAN

November 2013

PREFACE

Selected Agricultural Indicators, Malaysia, 2013 comprises of information on economy, employment, production and external trade for the agriculture sector include crops, livestock and fisheries.

The information in this publication is based on secondary data obtained internally within the Department and related agencies. International comparison for the production indicators of selected crops, livestock and fisheries are also presented to view the country's position in the agriculture sector.

The Department would like to express its appreciation and gratitude to all parties involved in contributing to this publication. Comments and suggestions towards improving future publications would be greatly appreciated.

DR. HAJI ABDUL RAHMAN BIN HASAN

Chief Statistician, Malaysia

RINGKASAN PENEMUAN

SUMMARY OF FINDINGS

RINGKASAN PENEMUAN

1. Ekonomi Sektor Pertanian

Prestasi ekonomi Malaysia mengalami pertumbuhan pesat di mana Keluaran Dalam Negeri Kasar (KDNK) telah menunjukkan peningkatan dari RM11.8 bilion pada 1970 kepada RM751.5 bilion pada 2012. Namun sumbangan sektor pertanian memperlihatkan trend penurunan sejak 1970 (28.8%) hingga 2012 (7.3%). Purata sumbangan sektor pertanian kepada KDNK bagi tempoh 2008 hingga 2012 adalah 7.6 peratus (**Jadual 1**).

Kelapa sawit menyumbang KDNK tertinggi dalam sektor pertanian iaitu 36.5 peratus pada 2012. Di samping itu, aktiviti pertanian lain (18.2%), perikanan (14.4%), ternakan (11.7%), perhutanan & pembalakan (11.0%) dan getah (8.2%) turut menyumbang kepada KDNK negara (**Jadual 2**).

Selangor, W.P. Kuala Lumpur, Sarawak, Johor dan Pulau Pinang merupakan penyumbang utama KDNK negara berjumlah RM483,540 juta (64.5%) pada 2012. Sepanjang tempoh lima tahun, Selangor kekal sebagai penyumbang utama sebanyak RM176,239 juta (23.5%), diikuti oleh W.P. Kuala Lumpur RM114,106 juta (15.2%) (**Jadual 3**).

SUMMARY OF FINDINGS

1. The Economy of the Agriculture Sector

*Performance of Malaysian economy experienced a rapid growth where the Gross Domestic Product (GDP) has increased from RM11.8 billion in 1970 to RM751.5 billion in 2012. However, the contribution of agriculture sector showed a declining trend since 1970 (28.8%) to 2012 (7.3%). The contribution of agriculture to GDP for the period 2008 to 2012 was 7.6 per cent (**Table 1**).*

*Palm oil contributed the highest GDP in the agricultural sector which is 36.5 per cent in 2012. In addition, other agricultural activities (18.2%), fishing (14.4%), livestock (11.7%), forestry & logging (11.0%) and rubber (8.2%) also contributed to the national GDP (**Table 2**).*

*Selangor, W.P. Kuala Lumpur, Sarawak, Johor and Pulau Pinang are major contributors to the national GDP amounted to RM483,540 million (64.5%) in 2012. Over the past five years, Selangor remained as the most significant contributor with RM176,239 million (23.5%), followed by W.P. Kuala Lumpur RM114,106 million (15.2%) (**Table 3**).*

Sumbangan KDNK mengikut negeri bagi sektor pertanian didominasi oleh Kelantan, Perlis dan Sabah dengan sumbangan melebihi 20 peratus (**Jadual 4**).

The contribution of GDP for agriculture sector at state level is dominated by Kelantan, Perlis and Sabah with contribution more than 20 per cent (Table 4).

2. Pengeluaran

2.1 Subsektor Tanaman

Pengeluaran minyak sawit mentah dan isirong sawit masing-masing menunjukkan penurunan sebanyak 126.5 ribu tan metrik dan 0.7 ribu tan metrik pada 2012 berbanding tahun sebelumnya. Pengeluaran getah asli juga turut mengalami penurunan kepada 922.8 ribu tan metrik (-7.4%).

2. Production

2.1 Crops sub-sector

The production of crude palm oil and palm kernel showed a declining of 126.5 thousand tonnes and 0.7 thousand tonnes respectively in 2012 as compared to the previous year. Natural rubber production also decreased to 922.8 thousand tonnes (-7.4%).

Pengeluaran tanaman makanan utama iaitu padi mencatatkan peningkatan kepada 2,750.4 ribu tan metrik (6.6%) pada 2012. Pengeluaran kelapa (43,974.0 tan metrik), buah-buahan (34,801.0 tan metrik) dan bunga-bungaan (2,085.4 tan metrik) juga turut meningkat pada tahun yang sama (**Jadual 6**).

The production of major food crops that is paddy increased to 2,750.4 thousand tonnes (6.6%) in 2012. The production of coconut (43,974.0 tonnes), fruits (34,801.0 tonnes) and flowers (2,085.4 tonnes) increased in the same year as well (Table 6).

2.2 Subsektor Ternakan

Pada 2012, pengeluaran daging lembu/kerbau telah meningkat 5.1 peratus, daging kambing/bebiri (18.5%), daging babi (1.0%), daging ayam/itik (3.0%), telur ayam/itik (3.4%) dan susu (5.8%) berbanding tahun sebelumnya (**Jadual 7**).

2.2 Livestock sub-sector

In 2012, production of beef has increased by 5.1 per cent, mutton (18.5%), pork (1.0%), poultry meat (3.0%), chicken/duck eggs (3.4%) and milk (5.8%) as compared to the previous year (Table 7).

Bilangan sembelihan ternakan kerbau tertinggi pada 2012 direkodkan di Perak iaitu 2,557 ekor dan Kelantan mencatatkan sembelihan ternakan tertinggi bagi lembu (32,380 ekor). Selangor mencatatkan bilangan sembelihan tertinggi bagi kambing (24,869 ekor), bebiri (6,557 ekor) dan babi (539,996 ekor) (**Jadual 8**).

*The highest number of buffalo slaughtered in 2012 was recorded in Perak which is 2,557 and Kelantan recorded the highest number of livestock slaughtered for cattle (32,380). Selangor recorded the highest number of slaughtered for goat (24,869), sheep (6,557) and swine (539,996) (**Table 8**).*

2.3 Subsektor Perikanan

Pendaratan ikan laut meningkat kepada 1,472.5 ribu tan metrik (7.2%) pada 2012 berbanding tahun sebelumnya. Perak mencatatkan peratusan pendaratan ikan laut tertinggi iaitu 21.5 peratus, diikuti Sabah (12.1%) dan Sarawak (9.6%) (**Jadual 9**).

Sepanjang 2008 hingga 2012, purata pertumbuhan tahunan bagi pengeluaran akuakultur air tawar adalah 14.4 peratus dan 16.1 peratus bagi pengeluaran akuakultur air payau.

Perak merupakan pengeluar terbesar bagi pengeluaran akuakultur air tawar sebanyak 92.3 ribu tan metrik dan Sabah adalah pengeluar tertinggi bagi pengeluaran akuakultur air payau (346.0 ribu tan metrik) (**Jadual 10**).

2.3 Fishing sub-sector

*Marine fish landings increased to 1,472.5 thousand tonnes (7.2%) in 2012 as compared to the previous year. Perak recorded the highest marine fish landings of 21.5 per cent, followed by Sabah (12.1%) and Sarawak (9.6%) (**Table 9**).*

During 2008 to 2012, average annual growth for aquaculture production of freshwater was 14.4 per cent and 16.1 per cent for aquaculture production of brackishwater.

*Perak is the largest producer for aquaculture production of freshwater totalled 92.3 thousand tonnes and Sabah is the highest producer for aquaculture production of brackishwater (346.0 thousand tonnes) (**Table 10**).*

3. Keluasan Bertanam

Bagi tempoh 2008 hingga 2012, keluasan bertanam kelapa sawit meningkat dengan purata pertumbuhan tahunan sebanyak 3.1 peratus daripada 4.5 juta hektar kepada 5.1 juta hektar.

Pada 2012, keluasan bertanam getah meningkat sebanyak 46.9 ribu hektar kepada 1,059.7 ribu hektar berbanding 2011, sebaliknya keluasan bertanam bagi tembakau dan herba masing-masing berkurangan sebanyak 1.7 ribu hektar dan 0.5 ribu hektar (**Jadual 12**).

3. Planted Area

For the period of 2008 to 2012, the planted area for oil palm increased with an average annual growth of 3.1 per cent from 4.5 million hectares to 5.1 million hectares.

4. Bilangan Ternakan

Bilangan ternakan ayam telah meningkat sebanyak 7.9 peratus, bebiri (4.4%), babi (1.7%) dan itik (1.4%) tetapi terdapat penurunan bagi kerbau (-3.7%), kambing (-3.7%) dan lembu (-3.4%) pada 2012 berbanding 2011 (**Jadual 13**).

Secara keseluruhan, ayam adalah ternakan yang paling banyak diternak (251,157,340 ekor) dan Johor mencatatkan bilangan ayam tertinggi sebanyak 60,275,562 ekor (24.0%) (**Jadual 14**).

4. Number of Livestock

*Number of chicken has increased by 7.9 per cent, sheep (4.4%), swine (1.7%) and duck (1.4%) but have declined for buffalo (-3.7%), goat (-3.7%) and cattle (-3.4%) in 2012 as compared to 2011 (**Table 13**).*

*As a whole, chicken is the most widely reared of livestock (251,157,340) and Johor recorded the highest number of chicken amounted to 60,275,562 (24.0%) (**Table 14**).*

5. Guna Tenaga Sektor Pertanian

Penduduk bekerja di sektor pertanian telah meningkat daripada 11.5 peratus pada 2011 kepada 12.6 peratus pada 2012. Peratusan lelaki adalah lebih tinggi (76.2%) berbanding perempuan (23.8%) yang bekerja di sektor pertanian (**Jadual 15**).

Bilangan tertinggi pekerja asing dalam sektor pertanian dicatatkan pada 2010 seramai 231,515 orang. Bilangan pekerja asing dalam sektor ini telah berkurangan kepada 143,021 orang (-6.1%) pada 2012 berbanding tahun sebelumnya (**Jadual 16**).

6. Pengeluaran Industri Asas Tani

Indeks Pengeluaran Perindustrian (IPP) pembuatan yang berdasarkan tahun 2005 menunjukkan peningkatan bagi tempoh 2008 hingga 2012 kecuali 2009. Kesemua produk pembuatan (item terpilih) memperolehi IPP lebih daripada 100 pada 2012. Roti, kek dan produk bakeri lain mencatatkan IPP tertinggi (250.4) (**Jadual 18**).

5. Employment in the Agriculture Sector

*The employed persons in agriculture sector has increased from 11.5 per cent in 2011 to 12.6 per cent in 2012. The percentage of employed male was higher (76.2%) than female (23.8%) in the agriculture sector (**Table 15**).*

*The highest number of foreign workers in the agriculture sector is 231,515 workers in 2010. The number of foreign workers in this sector has reduced to 143,021 workers (-6.1%) in 2012 as compared to the previous year (**Table 16**).*

6. Production of Agro-based Industries

*The Industrial Production Index (IPI) of manufacturing with 2005 as the base year showed an increase for the period 2008 to 2012 except 2009. All the manufacturing products (selected items) had the IPI more than 100 in 2012. Bread, cake and other bakery products record the highest IPI (250.4) (**Table 18**).*

7. Harga bagi Subkumpulan Makanan dan Minuman Bukan Alkohol

Indeks Makanan & Minuman Bukan Alkohol pada 2012 ialah 107.6 dengan kenaikan sebanyak 2.7 peratus berbanding 2011.

Peningkatan indeks ini adalah akibat daripada kenaikan indeks Makanan di Rumah (2.1%); Makanan di Luar Rumah (3.7%) dan Kopi, Teh, Koko & Minuman Bukan Alkohol (2.9%) (**Jadual 19**).

7. Prices for Sub-Groups of Food and Non-Alcoholic Beverages

The index for Food & Non-Alcoholic Beverages in 2012 was 107.6 with an increase of 2.7 per cent as compared to 2011.

*The increased in the index is due to the increase for Food at Home (2.1%); Food Away from Home (2.9%) and Coffee, Tea, Cocoa & Non-Alcoholic Beverages (2.9%) (**Table 19**).*

8. Perdagangan Luar Negeri Sektor Pertanian

Jumlah eksport dan import bagi sektor pertanian masing-masing adalah RM119.8 bilion dan RM79.2 bilion bagi 2012.

Imbangan perdagangan sektor pertanian menunjukkan penurunan daripada RM56.3 bilion pada 2011 kepada RM40.6 bilion pada 2012 (**Jadual 20**).

8. External Trade for Agriculture Sector

In 2012, the total exports and imports for the agriculture sector were RM119.8 billion and RM79.2 billion respectively.

*Balance of trade for agriculture sector showed a decrease from RM56.3 billion in 2011 to RM40.6 billion in 2012 (**Table 20**).*

9. Kadar Sara Diri (SSR)

Kadar sara diri (SSR) merujuk kepada sejauh mana pengeluaran domestik dapat memenuhi keperluan penduduk. Pada 2011, pengeluaran kelapa meningkat 2.3 peratus berbanding 2010, namun tidak mencukupi untuk menampung keperluan domestik kerana SSR masih di bawah paras 100 peratus (96.3 %).

Nanas, pisang, tembakai, durian dan cempedak/nangka mengekalkan SSR melebihi 100 peratus manakala mangga mencatatkan kadar sara diri di bawah 100 peratus bagi tempoh 2007 hingga 2011 (**Jadual 38**).

Tomato, timun, terung, kacang panjang, bendi dan bayam mencapai paras SSR melebihi 100 peratus bagi tempoh 2007 hingga 2011 (**Jadual 39**).

Berdasarkan SSR bagi hasilan ternakan terpilih, hanya telur ayam/itik mencatatkan kadar sara diri melebihi 100 peratus bagi tempoh 2007 hingga 2011 (**Jadual 40**).

9. Self-sufficiency ratio (SSR)

Self-sufficiency ratio (SSR) refers to the extent to which domestic production can meet the population requirement. In 2011, the production of coconut grew 2.3 per cent when compared to 2010, but insufficient to meet the domestic need as the SSR was still below 100 per cent (96.3%).

*Pineapple, banana, watermelon, durian and jackfruit remained SSR above 100 per cent whereas mango recorded its SSR below 100 per cent for the period 2007 to 2011 (**Table 38**).*

*Tomato, cucumber, brinjal, long bean, lady's finger and spinach attained SSR above 100 per cent for the period 2007 to 2011 (**Table 39**).*

*Based on the SSR for selected livestock products, only chicken/ duck egg recorded more than 100 per cent of SSR for the period 2007 to 2011 (**Table 40**).*

10. Perbelanjaan Bulanan Purata Isi Rumah

Pada 2009/2010, perbelanjaan bulanan purata isi rumah adalah RM2,190. Perbelanjaan purata yang tertinggi ialah bagi kumpulan perbelanjaan perumahan, air, elektrik, gas dan bahan api lain iaitu RM495 (22.6%), diikuti oleh kumpulan makanan dan minuman bukan alkohol sebanyak RM444 (20.3%) (**Jadual 41**).

Ikan dan makanan laut memperoleh perbelanjaan purata tertinggi iaitu RM98 bagi kumpulan makanan dan minuman bukan alkohol pada tempoh tersebut (**Jadual 42**).

10. Average Monthly Expenditure for Household

*In 2009/2010, the average monthly household expenditure was RM2,190. The highest average expenditure group was for housing, water, electricity, gas and other fuels at RM495 (22.6%), followed by food and non-alcoholic beverages amounted to RM444 (20.3%) (**Table 41**).*

*Fish and seafood obtained the highest average expenditure of RM98 on food and non-alcoholic beverage during the period (**Table 42**).*

JADUAL *TABLES*

NOTA TEKNIKAL

TECHNICAL NOTES

NOTA TEKNIKAL

1. Indikator Pertanian

Indikator pertanian merujuk kepada parameter kuantitatif bagi variabel yang dapat memberikan penilaian ringkas mengenai pengukuran atau status maklumat perangkaan pertanian. Indikator ini juga merupakan ciri-ciri atau kriteria relevan yang dapat mengurangkan keraguan kepada sesuatu penilaian yang dibuat (*reliability*).

Antara parameter yang terlibat dalam indikator pertanian adalah Keluaran Dalam Negeri Kasar (KDNK), guna tenaga, pengeluaran, keluasan bertanam, harga dan perdagangan luar negeri.

2. Akaun Negara

Maklumat KDNK adalah berdasarkan konsep dan metodologi yang terdapat dalam *System of National Accounts, 1993* (SNA 1993) daripada *United Nations*.

KDNK pada harga malar adalah mengikut tahun asas yang berlainan. Tahun asas tersebut ialah 1970, 1978, 1987, 2000 dan 2005.

TECHNICAL NOTES

1. Agricultural Indicators

Agricultural indicators refer to the quantitative parameter of the variable that is able to give a brief assessment about the measurement on the status of the information on agricultural statistics. It is also an important and relevant characteristic or criteria that could reduce uncertainty on the assessment made on its reliability.

Among the parameters related to the agricultural indicators are Gross Domestic Product (GDP), employment, production, planted area, prices and external trade.

2. National Accounts

The compilation of GDP in Malaysia is currently based on the concepts and methodology outlined in the System of National Accounts, 1993 (SNA 1993) of the United Nations.

GDP at constant price is based on different base years. The base years are 1970, 1978, 1987, 2000 and 2005.

Pengasasan semula tahun asas dilakukan bagi memastikan data Akaun Negara menggambarkan perubahan struktur ekonomi dan perubahan harga relatif yang lebih tepat. Ini membolehkan data pada harga malar dirujuk kepada harga asas yang terkini.

Struktur harga dan wajaran terbaru dapat memberikan ukuran yang lebih tepat kepada perubahan aggregat dari segi nilai dalam KDNK dan petunjuk makroekonomi yang lain.

3. Guna tenaga

Data penduduk bekerja diperoleh daripada Penyiasatan Tenaga Buruh. Tenaga Buruh merujuk kepada mereka yang berumur 15 hingga 64 tahun (dalam tahun genap pada hari lahir terakhir) semasa minggu rujukan, sama ada bekerja atau menganggur.

Penduduk bekerja merujuk kepada semua orang yang bekerja sekurang-kurangnya sejam semasa minggu rujukan untuk mendapatkan upah, keuntungan atau keuntungan keluarga (sebagai majikan, pekerja, bekerja sendiri atau pekerja keluarga tanpa gaji).

The rebasing exercise ensures that National Accounts data reflects accurate structural changes in the economy as well as changes in relative prices. Therefore, constant prices are derived by using the price of a more recent year.

The latest price structure and weightage provide more accurate measurement to the aggregate changes in term of GDP value as well as other macroeconomic indicators.

3. Employment

Data of labour force obtained from the Labour Force Survey. Labour force refers to those who during the reference week, are in the 15 to 64 years age group (in completed years at last birthday) and who are either employed or unemployed.

Employed workers refer to all persons who, at any time during the reference week worked at least one hour for pay, profit or family gain (as an employer, employee, own-account worker or unpaid family worker).

4. Pengeluaran sektor pertanian dan keluasan bertanam

Data pengeluaran bagi tanaman, ternakan dan perikanan serta keluasan bertanam diperoleh daripada Kementerian Pertanian dan Asas Tani kecuali bagi kelapa sawit yang diperoleh daripada Lembaga Minyak Sawit Malaysia. Data getah diperoleh daripada penerbitan Perangkaan Getah Tahunan.

Keluasan bertanam merujuk kepada keluasan yang ditanam sama ada matang dan/atau belum matang.

Sembelihan ternakan yang direkod merujuk kepada bilangan ternakan yang dilaporkan oleh individu yang memohon permit daripada setiap Jabatan Perkhidmatan Veterinar (DVS) Negeri untuk melakukan sembelihan. Termasuk juga jumlah sembelihan di bawah rumah sembelihan seliaan jabatan. Data bilangan ternakan diperoleh daripada DVS.

Akuakultur adalah pembiakan benih ikan atau pemeliharaan biak ikan melalui perusahaan ternak keseluruhan atau sebahagian daripada peredaran hidupnya. Akuakultur terdiri daripada akuakultur air tawar dan air payau/masin.

4. Production and Planted areas

Data for the production of crops, livestock and fisheries as well as planted area is obtained from the Ministry of Agriculture and Agro-based Industries except for palm oil is obtained from the Malaysian Palm Oil Board. Data for rubber is obtained from the publication of Annual Rubber Statistics.

Planted area refers to the area which is either mature and/or immature.

Recorded slaughter of livestock refers to the number of livestock reported by individual who have applied permits from State Department of Veterinary Services (DVS) for slaughtering activities. It also includes total number of slaughtered livestock from slaughtered house under the supervision of the department. Number of livestock is also obtained from DVS.

Aquaculture is the propagation of fish seed or the raising of fish through husbandry during the whole or part of its life cycle. Aquaculture consists of freshwater aquaculture and brackishwater/marine aquaculture.

5. Indeks Pengeluaran Perindustrian (2005=100)

Indeks Pengeluaran Perindustrian (IPP) bertujuan untuk mengukur kadar perubahan sebenar dalam pengeluaran komoditi bagi satu tempoh masa.

Penerbitan ini memaparkan IPP bagi pembuatan makanan terpilih berasaskan tanaman, ternakan dan perikanan.

Konsep dan definisi yang digunakan adalah berdasarkan Piawaian Klasifikasi Industri Malaysia (MSIC) 2000 yang selaras dengan *International Standard Industrial Classification of All Economic Activities* (ISIC), Rev.3.

6. Indeks Harga Pengguna (2010=100)

Indeks Harga Pengguna (IHP) mengukur perubahan peratus kos pembelian mengikut masa bagi “bakul” tetap barang dan perkhidmatan yang mewakili corak purata pembelian oleh sekumpulan penduduk pada sesuatu tempoh masa yang ditetapkan.

“Bakul” ini merujuk kepada barang dan perkhidmatan yang mempunyai kualiti dan kuantiti yang seakan-akan sama atau tidak berubah, mengandungi item yang berada lama atau boleh diukur secara berterusan di pasaran berbanding dengan masa.

5. Industrial Production Index (2005=100)

Industrial Production Index (IPI) is to measure the rate of change in the production of industrial commodities in real terms over time.

The publication highlights the IPI for selected food-related agro-based industries of crops, livestock and fisheries.

Concepts and definitions used were based on Malaysia Standard Industrial Classification (MSIC) 2000 which adhere to the International Standard Industrial Classification of All Economic Activities (ISIC), Rev.3.

6. Consumer Price Index (2010=100)

The Consumer Price Index (CPI) measures the percentage change through time in the cost of purchasing a constant “basket” of goods and services representing the average pattern of purchases made by a particular population group in a specified time period.

The “basket” is of an unchanging or equivalent quantity and quality of goods and services, consisting of items for which there are continually measurable market prices over time.

Perubahan harga barang yang berlaku dalam bakul ini adalah disebabkan oleh perubahan harga yang sebenarnya sahaja, iaitu perubahan harga ini tidak berkaitan langsung dengan perubahan pada kuantiti atau kualiti barang dan perkhidmatan tersebut.

Barangan dan perkhidmatan yang diliputi dalam “bakul” ini adalah luas, dikelaskan berpandu kepada *United Nations Classification of Individual Consumption According to Purpose (COICOP)* dalam 12 kumpulan berikut:

Makanan dan Minuman Bukan Beralkohol
Minuman Beralkohol dan Tembakau
Pakaian dan Kasut
Perumahan, Air, Elektrik, Gas dan Bahan Api Lain
Hiasan, Perkakasan dan Penyelenggaraan Isi Rumah
Kesihatan
Pengangkutan
Komunikasi
Perkhidmatan Rekreasi dan Kebudayaan
Pendidikan
Restoran dan Hotel
Pelbagai Barang dan Perkhidmatan

Changes in the costs of items in the basket are therefore due only to pure price movements, i.e. price movements that are not associated with changes in the quality and/or quantity of the set of consumer goods and services in the basket.

This “basket” covers a wide range of goods and services, classified according to the United Nations Classification of Individual Consumption According to Purpose (COICOP) in the following 12 groups:

*Food and Non-alcoholic Beverages
Alcoholic Beverages and Tobacco
Clothing and Footwear
Housing, Water, Electricity, Gas and Other Fuels
Furnishings, Household Equipment and Routine Household Maintenance
Health
Transport
Communication
Recreation Services and Culture
Education
Restaurants and Hotels
Miscellaneous Goods and Service*

7. Perdagangan Luar Negeri

Malaysia menggunakan ‘sistem umum’ dalam menyusun perangkaan perdagangan luar negerinya. Di bawah sistem ini, sempadan negara digunakan sebagai sempadan perangkaan. Semua barang yang dibawa masuk atau keluar dari negara direkodkan, sama ada barang itu tertakluk kepada kelulusan tertentu atau pun tidak. Barang yang dibawa masuk atau keluar dari gudang simpanan kastam, Zon Perdagangan Bebas dan Zon Bebas direkodkan di dalam perangkaan ini.

Barang dagangan dikelaskan mengikut *Standard International Trade Classification, Revision 4 (S.I.T.C. Rev. 4)* daripada *United Nations*.

7. External Trade

The general system of recording is adopted in compiling Malaysian external trade statistics. Under this system, the national boundary of the country is used as the statistical frontier. All goods entering or leaving the country are recorded, whether or not such goods are subject to clearance. Accordingly, goods entering or leaving customs bonded warehouses, Free Trade Zones and Free Zones are recorded in the statistics.

8. Perbelanjaan penggunaan isi rumah

Perbelanjaan penggunaan isi rumah adalah segala perbelanjaan untuk kegunaan persendirian ke atas barang dan perkhidmatan sepanjang tempoh rujukan. Definisi perbelanjaan penggunaan isi rumah yang diguna pakai dalam Penyiasatan Perbelanjaan Isi Rumah pada asasnya mengikut syor *United Nations* menerusi penerbitan SNA 1993, Series F, Number 2 Rev. 4.

8. Household consumption expenditure

Household consumption expenditure is the expenditure incurred by private households on consumption of goods and services during the reference period. The definition of household consumption expenditure used in the Household Expenditure Survey basically refers to the recommendations of the United Nations as published in the SNA 1993, Series F, Number 2 Rev. 4.

9. Kadar sara diri

Kadar sara diri menerangkan tentang magnitud pengeluaran terhadap penggunaan domestik. Ia menunjukkan setakat mana bekalan domestik dalam negara dihasilkan daripada pengeluaran domestik.

Kadar sara diri yang kurang daripada 100 peratus menunjukkan pengeluaran tidak mencukupi untuk memenuhi keperluan domestik. Manakala kadar yang melebihi 100 peratus pula, pengeluaran adalah mencukupi untuk memenuhi keperluan domestik.

10. Pembundaran

Jumlah bagi komponen mungkin berbeza dengan jumlah besar dalam jadual penerbitan disebabkan oleh pembundaran angka.

11. Pengiraan purata pertumbuhan tahunan

Pengiraan purata pertumbuhan tahunan (r) adalah berdasarkan formula berikut:

$$Y_t = Y_0 (1 + r)^t$$

dan

$$r = \left[e^{\frac{1}{t} \ln\left(\frac{y_t}{y_0}\right)} - 1 \right] \times 100$$

9. Self-sufficiency ratio (SSR)

Self-sufficiency ratio (SSR) expresses the magnitude of production in relation to domestic utilization. It is the extent to which a country's supply of commodities is derived from its own domestic production.

SSR of less than 100 per cent indicates inadequacy of production to cope with the demand of the domestic requirements, whilst ratio of greater than 100 per cent indicates that domestic production is more than enough to support the domestic requirements.

10. Rounding

The sum of components may not add up to the totals in the tables presented in this publication due to rounding.

11. Calculating average annual growth

The average annual growth (r) in the value of a variable over the period of a year based on:

$$Y_t = Y_0 (1 + r)^t$$

and

$$r = \left[e^{\frac{1}{t} \ln\left(\frac{y_t}{y_0}\right)} - 1 \right] \times 100$$

Di mana ;

Y_t = Nilai pada tahun semasa

Y_o = Nilai pada tahun sebelum

t = Bilangan tahun, $Y_t - Y_o$

r = Purata pertumbuhan tahunan

Where :

Y_t = *Value at current year*

Y_o = *Value at previous year*

t = *Number of years, $Y_t - Y_o$*

r = *Average annual growth*

12. Nota dan Simbol

Nota dan Simbol berikut digunakan dalam penerbitan ini:
