Pertubuhan ditakrifkan sebagai “satu unit ekonomi yang bergiat di bawah satu hak milik atau penguasaan tunggal, iaitu di bawah satu entiti yang sah. Census year

Census year refers to the year in which a census was conducted.

Reference year *The reference period of the census was the calendar year 2010. Establishments whose accounting year differed from calendar year were asked to report according to the accounting year covering the major part of the reference year.*

Methodology *The census was primarily conducted by mail inquiry. Respondents were given one month to complete and return the questionnaires to the Department after which field enumeration was undertaken for the establishments that did not respond.*

Reporting unit *The census was conducted on an **establishment** basis. An establishment is defined as "an economic unit that engaged in one activity, under a single legal entity and operating in a single physical location". Each establishment was assigned an industry classification based on its principal activity and not to that of its parent company.*

In the case of a multi-activity entity, units engaged in separate activities in the same location constituted distinct establishments. Thus, each branch of a multi-branch organisation at a different location was conceptually treated as a different establishment. The establishment was requested to give separate returns for each activity in terms of value. However, if in practice, the accounts were centrally kept such that it was not possible to obtain separate data for each individual unit or branch, that entity or enterprise was treated as a single reporting unit and allowed to submit a consolidated questionnaire covering all units or branches.

Type of business activity *Type of business activity refers to both principal and secondary activities. The principal activity refers to the activity to which the establishment devoted most of its resources or activity which contributes the largest income. Secondary activities are those incidental or ancillary to the principal activity. The classification of the industry of the establishment is based on the principal activity and is in accordance to the Malaysia Standard Industrial Classification 2008 (MSIC) 2008 ver. 1.0. The MSIC 2008 conforms to the latest International Standard Industrial Classification of All Economic Activities (ISIC), Revision 4, United Nations, with modifications to suit local conditions.*
