# IMBANGAN PEMBAYARAN

## SUKU PERTAMA 2013

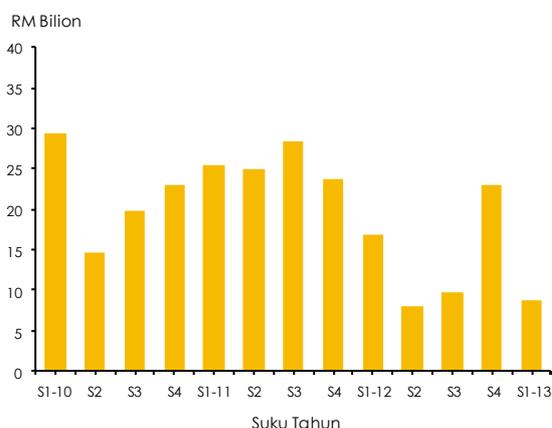

### PENGENALAN

Bermula suku pertama 2013, DOSM mula melaksanakan standard statistik antarabangsa yang terkini seperti yang ditetapkan dalam Manual Imbangan Pembayaran Edisi Keenam (BPM6), 2009 oleh Tabung Kewangan Antarabangsa (IMF). Penyusunan sebelum ini adalah berasaskan Manual Imbangan Pembayaran Edisi Kelima (BPM5), 1993 yang diterbitkan oleh organisasi yang sama. Data siri masa dari suku pertama 2005 juga diterbitkan berdasarkan BPM6.

Adaptasi semasa bagi BPM6 terutamanya melibatkan pengkelasan semula dan penelitian kepada data sedia ada. Pengkelasan semula yang utama dan format penerbitan antara BPM5 dan BPM6 masing-masing ditunjukkan di **Lampiran I** dan **Lampiran II**. Bagi tujuan memudahkan pengguna, data pelaburan langsung ditunjukkan mengikut asas aset & liabiliti (seperti BPM6) dan asas arah aliran (seperti BPM5).

# BALANCE OF PAYMENTS

## FIRST QUARTER 2013

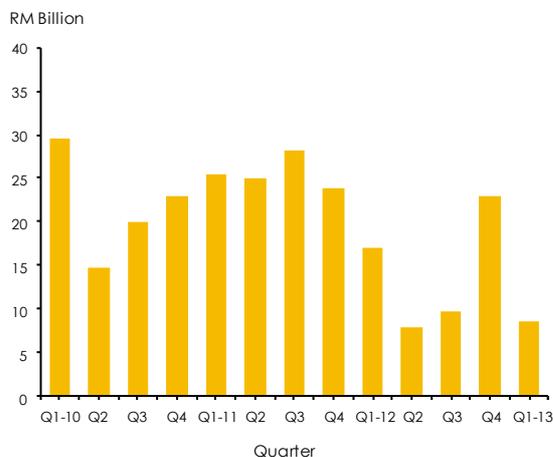

### INTRODUCTION

Starting first quarter 2013, DOSM commenced the implementation of the latest international statistical standards as set forth in the Balance of Payments Manual Sixth Edition (BPM6), 2009 by International Monetary Fund (IMF). Previously the compilations were based on Balance of Payments Manual Fifth Edition (BPM5), 1993 published by the same organization. The back series data from first quarter 2005 are also published based on BPM6.

The current adoption of BPM6 mainly involves reclassifications and refinements to existing data items. The main reclassifications and publication format between BPM5 and BPM6 are shown in **Appendix I** and **Appendix II**, respectively. For the purpose of facilitating the users, direct investment data are presented on both assets & liabilities (as per BPM6) and directional basis (as per BPM5).

### CURRENT ACCOUNT

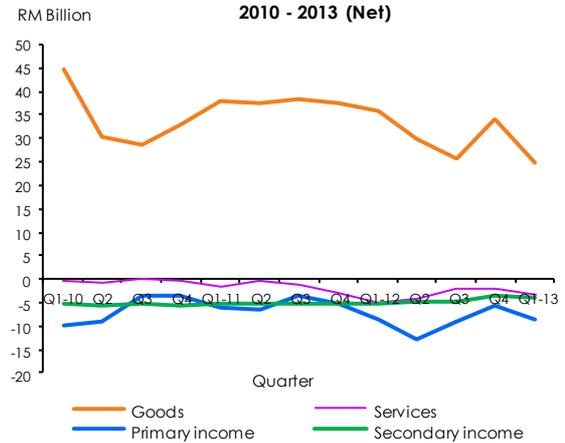

Chart 1: Current Account, 2010 - 2013 (Net)

In the period January – March 2013, current account recorded lower surplus RM8.7 billion from RM22.9 billion last quarter. This was mainly attributed to:

Year-on-year, goods account recorded lower surplus by RM11.3 billion from RM36.0 billion a year ago. This was due to increase in imports f.o.b. larger than the decreased of exports f.o.b. where imports f.o.b. increased to RM144.8 billion (Q1 2012: RM138.1 billion) and exports f.o.b. recorded RM169.4 billion (Q1 2012: RM174.1 billion).

## NOTA KETERANGAN

### A. PENGENALAN

Statistik Imbangan Pembayaran Malaysia mengukur transaksi ekonomi antarabangsa antara Malaysia dan negara-negara lain di dunia dari segi magnitud dan jenis transaksi dalam akaun semasa, akaun modal dan akaun kewangan. Penyusunan ini selaras dengan metodologi yang ditetapkan dalam Manual Imbangan Pembayaran Edisi Keenam oleh Tabung Kewangan Antarabangsa (IMF).

### B. KONSEP DAN LIPUTAN

#### 1. Residen

Residen ialah:

- orang yang tinggal atau menetap di Malaysia bagi tempoh sekurang-kurangnya satu tahun; dan
- syarikat atau institusi yang berada/beroperasi di Malaysia di mana kepentingan ekonominya berpusat di Malaysia.

Satu unit institusi dikatakan mempunyai pusat kepentingan di wilayah ekonomi di sebuah negara apabila wujudnya lokasi seperti bangunan, tempat pengeluaran, atau premis lain dimana atau dari mana unit tersebut mengusahakan atau bercadang untuk terus mengusahakan, sama ada untuk tempoh selama-lamanya atau tempoh yang panjang, di dalam aktiviti ekonomi dan dengan skala urusan yang signifikan.

#### 2. Bukan Residen

Bukan residen merujuk kepada individu, syarikat atau institusi yang tinggal, atau berada/beroperasi di negara luar Malaysia.

Status residen perwakilan kerajaan asing, organisasi antarabangsa, pelajar asing dan pesakit asing, adalah seperti berikut:

- perwakilan kerajaan asing (kedutaan, konsulat, pangkalan ketenteraan, kerajaan asing) di Malaysia ada dianggap sebagai pihak luar-wilayah dan, dengan itu dianggap sebagai bukan-residen;
- perwakilan kerajaan Malaysia di luar negeri dianggap sebagai residen Malaysia;
- organisasi antarabangsa tidak dianggap sebagai residen bagi mana-mana ekonomi/negara; dan
- pelajar asing dan pesakit asing dianggap sebagai residen negara asal mereka.

#### 3. Sistem Catatan Beregu

Sistem ini berdasarkan prinsip perakaunan yang diterima di peringkat antarabangsa bagi merekodkan dua kemasukan yang sama bagi setiap urusan. Kemasukan kredit untuk merekodkan eksport barangan dan perkhidmatan, pendapatan diterima dan urusan kewangan yang melibatkan pengurangan dalam aset kewangan atau meningkatkan liabiliti. Sebaliknya, kemasukan debit adalah digunakan untuk merekodkan import barangan dan perkhidmatan, pendapatan yang akan dibayar dan urusan kewangan yang melibatkan peningkatan dalam aset atau pengurangan dalam liabiliti.

## NOTA KETERANGAN

---

### 4. Akaun Semasa

ia mengukur peruntukan bersih sumber sebenar iaitu barangan, perkhidmatan, pendapatan primer dan sekunder kepada atau daripada seluruh dunia. Lebihan dalam akaun berlaku apabila pendapatan melebihi perbelanjaan, manakala defisit berlaku jika ia sebaliknya. Defisit dalam akaun semasa mungkin dibiayai oleh aliran masuk pelaburan asing atau pinjaman luar negara atau penggunaan dalam aset rizab.

#### i. Barangan

Semua urusanniaga barangan yang melibatkan pertukaran hak milik di antara residen dan bukan-residen adalah diliputi. Barangan dinilai berdasarkan harga pasaran.

Perkhidmatan penghantaran barangan sehingga ke sempadan kastam termasuk dalam barangan. Perkhidmatan penghantaran yang disediakan melepasi sempadan kastam oleh pengangkut tempatan adalah dikelaskan sebagai tambang muatan eksport.

Peraturan pertukaran hak milik digunapakai dalam mendefinisikan dagangan bagi memastikan pada prinsipnya komponen tersebut adalah konsisten dalam liputan dan selaras dengan komponen - komponen lain dalamimbangan pembayaran. Walau bagaimanapun, standard antarabangsa digunakan bagi perangkaan perdagangan luar negeri berdasarkan kepada pergerakan fizikal barangan merentasi sempadan kastam.

Secara umumnya, pertukaran hak milik bagi kebanyakan barangan berlaku pada masa yang sama apabila ia secara fizikalnya bergerak melepasi sempadan.

Proksi nilai pasaran di sempadan kastam Malaysia bagi barangan eksport yang dilaporkan kepada pihak kastam ialah nilai f.o.b. dan nilai c.i.f. bagi barangan import.

- Eksport f.o.b merujuk kepada nilai barangan di pasaran di sempadan perangkaan/kastam, iaitu termasuk semua kos pengangkutan barangan ke sempadan perangkaan/kastam, eksport dan duti lain yang kena bayar, dan juga kos punggahan ke kenderaan pengangkut melainkan kos ditanggung sendiri oleh syarikat pengangkut.
- Import c.i.f. merujuk kepada nilai barangan di pasaran sempadan perangkaan/kastam, iaitu termasuk semua caj pengangkutan dan insurans ketika dalam perjalanan tetapi tidak termasuk kos punggahan daripada kapal, kapal terbang atau kenderaan, melainkan kos sedemikian ditanggung sendiri oleh syarikat pengangkut tersebut. Nilai c.i.f. dibuat penyesuaian kepada nilai f.o.b. dalam penyusunan perangkaanimbangan pembayaran.

Nilai barangan yang diperolehi daripada pengisytiharan kastam (perangkaan perdagangan luar negeri) diselaraskan untuk liputan yang merangkumi urusanniaga pesawat udara dan kapal komersil, yang dihantar ke luar Malaysia, import barangan ketenteraan dan eksport/import air ke/dari Singapura. Sebaliknya, pengecualian bagi eksport/import yang tidak berlaku pertukaran hak milik termasuklah barangan yang dikembalikan (barangan ini telah diimport dan dikembalikan semula kerana didapati rosak atau tidak menepati spesifikasi) dan kenderaan terpakai yang dieksport/diimport untuk kegunaan persendirian.

## NOTA KETERANGAN

---

Imbangan barangan adalah berbeza dengan perdagangan luar negeri dan perangkaan BOP kerana:

- import direkodkan pada c.i.f. bagi perangkaan perdagangan luar negeri; dan
- liputan dan masa berlaku pertukaran hak milik barangan disesuaikan dalam BOP.

*Merchanting* ditakrifkan sebagai pembelian barangan oleh residen daripada bukan-residen dan menjual semula kepada bukan-residen lain tanpa barangan tersebut perlu memasuki Malaysia. Perbezaan antara nilai pembelian dan jualan semula barangan direkodkan sebagai eksport bersih barangan di bawah *merchanting*.

### ii. Perkhidmatan

Perkhidmatan adalah hasil daripada aktiviti pengeluaran yang melibatkan perubahan keadaan unit pengeluaran, atau memenuhi pertukaran produk atau aset kewangan. Perkhidmatan bukan secara umum dipisahkan kepada item dimana hak milik boleh diwujudkan dan tidak boleh secara umum dipisahkan daripada pengeluaran mereka.

#### a. Perkhidmatan Penyenggaraan dan Pembaikan t.t.t.l.

- (b) Penghantaran barangan biasanya ditetapkan bermula di sempadan kastam negara pengeksport. Ini dibuat sebagai asas dalam pengiraan penghantaran barangan dan supaya ianya konsisten dengan penilaian f.o.b. bagi komponen barangan. Prosedur penyusunan adalah seperti berikut:
- dikira sebagai eksport semua perkhidmatan yang dibekalkan oleh residen Malaysia/negara lain ke atas eksport, sebaik sahaja barangan eksport tersebut dimuatkan ke kapal/pesawat udara di sempadan Malaysia/negara lain dari tempat dimana barangan di eksport; dan
  - dikira sebagai import semua perkhidmatan yang dibekalkan oleh residen asing ke atas import Malaysia, sebaik sahaja barangan tersebut dimuatkan ke kapal/pesawat udara di sempadan kastam negara pengeksport.
- (c) Bayaran tambang muatan kepada syarikat perkapalan dan penerbangan bukan-residen atas perkhidmatan yang diterima berkaitan barangan import Malaysia. Pendapatan tambang muatan yang diterima oleh syarikat residen kerana perkhidmatan pengangkutan barangan import Malaysia tidak diambil kira berdasarkan andaian semua perbelanjaan tambang muatan bagi import adalah ditanggung oleh residen.

### **(ii) Perkhidmatan Pengangkutan Penumpang**

- (a) Perkhidmatan ini merujuk kepada pengangkutan penumpang di peringkat antarabangsa. Perkhidmatan lain yang membabitkan perbelanjaan penumpang yang menaiki kapal/pesawat udara, bayaran kerana lebihan bagasi dan barangan persendirian yang dibawa bersama juga diambil kira.

### **(iii) Perkhidmatan Pengangkutan Lain**

- (a) Bayaran bagi perkhidmatan di pelabuhan atau di lapangan terbang oleh syarikat pengangkut direkodkan disini. Perkhidmatan tersebut termasuklah perkhidmatan pemunggahan kargo, perkhidmatan lapangan terbang/pelabuhan, pengemudian, penundaan, penyenggaraan dan pembaikan.

- (ii) Kedua-dua jenis pelawat iaitu pelancong dan pelawat harian adalah termasuk dalam penyusunan ini. Lembaga Penggalakan Pelancongan Malaysia mendefinisikan pelancong dan pelawat harian seperti berikut:

- **Pelancong**

“Warga asing yang melawat Malaysia bukan untuk tujuan bekerja di Malaysia, dan tinggal sekurang-kurangnya satu malam tetapi tidak melebihi satu tahun”; dan

- **Pelawat Harian**

“Warga asing yang melawat Malaysia bukan untuk tujuan bekerja di Malaysia, dan tinggal kurang daripada 24 jam dan tidak bermalam”.

Pendapatan pelaburan melibatkan terimaan pendapatan dan pembayaran ke atas aset dan liabiliti kewangan asing.

## NOTA KETERANGAN

---

BPM6 telah menggariskan kategori pendapatan pelaburan sebagai pendapatan pelaburan langsung, pendapatan pelaburan portfolio dan pendapatan pelaburan lain.

Pendapatan Pelaburan Langsung terdiri daripada:

- dividen, iaitu agihan keuntungan atas pemilikan ekuiti enterpris pelaburan langsung;
- remit keuntungan cawangan;
- perolehan dilabur semula, iaitu merujuk kepada perolehan saham langsung pelabur ke atas DIE yang tidak diagihkan. Keuntungan/kerugian saham langsung pelabur yang tidak diagihkan adalah dilihat sebagai penyediaan modal tambahan kepada enterpris; dan
- Faedah atas pinjaman dan sekuriti hutang dikalangan syarikat yang berkaitan.

Pendapatan pelaburan portfolio merupakan transaksi pendapatan di antara residen dan bukan residen ekoran daripada pemilikan saham, bon, nota, dan instrumen pasaran wang.

Pendapatan pelaburan lain merangkumi:

- pendapatan sektor awam iaitu Kerajaan Pusat, kerajaan negeri, badan berkanun, Bank Negara Malaysia dan Agensi kerajaan, yang diterima daripada atau dibayar kepada kerajaan asing, bank pusat atau organisasi antarabangsa; dan
- pendapatan sektor swasta, seperti faedah daripada pinjaman, deposit, dan dll.

### iv. Pendapatan Sekunder

Pendapatan sekunder meliputi transaksi ekonomi yang tidak berbalas. Ia merekodkan entri pengimbang yang diperlukan dalam sistem catatan beregu dalam BOP, iaitu apabila sumber (barangan, perkhidmatan dan aset kewangan) dibekalkan tanpa menerima balasan yang mempunyai nilai ekonomi.

Pendapatan sekunder adalah diklasifikasikan kepada dua kategori standard utama: kerajaan dan sektor lain yang meliputi pindahan peribadi dan pindahan semasa lain secara tunai (cth. pencen, denda, cukai, hadiah yang dimenangi dari loteri) atau bentuk barangan (cth. hadiah makanan, bekalan perubatan, pakaian).

Jika bukan residen membekalkan sumber kepada residen, item pengimbang kredit diperlukan dan jika sebaliknya, item pengimbang debit diperlukan.

Oleh kerana pindahan berperanan sebagai item pengimbang kepada sumber atau item kewangan yang dibekalkan tanpa balasan, maka nilainya haruslah bersamaan dengan nilai sebenar sumber atau item kewangan yang dibekalkan itu. Pada prinsipnya, pindahan dicatatkan pada ketika sumber yang diimbangnya bertukar milik.

## NOTA KETERANGAN

Aset rizab merujuk kepada tuntutan BNM terhadap bukan residen bagi memenuhi keperluan BOP. Aset ini terdiri daripada pegangan BNM terhadap SDR, Kedudukan Dana Rizab Malaysia, Emas & Tukaran Asing dan Sumber IMF.

SDR – SDR ialah aset yang diwujudkan oleh IMF untuk memenuhi keperluan global apabila ia diperlukan. Ia diwujudkan sebagai tambahan kepada aset rizab yang sedia ada.

Kedudukan Rizab IMF – Kedudukan rizab Malaysia di IMF dirujuk dalam terma SDR, yang mencerminkan urusan dengan IMF dalam suatu tempoh. IMF akan membenarkan Malaysia untuk membeli SDR atau matawang negara lain sebagai pertukaran kepada Ringgit. Pembelian (atau pengeluaran) matawang negara lain daripada IMF menyebabkan kedudukan rizab Malaysia di IMF akan berkurangan sebaliknya penjualan semula (pembayaran balik) akan menyebabkan kesan sebaliknya.

Emas & Tukaran Asing – Pegangan emas merujuk kepada emas monetari yang dipegang oleh BNM. Rizab pertukaran asing yang dipegang biasanya dalam bentuk mata wang utama digunakan untuk tujuan bayaran perdagangan. Rizab ini juga diperlukan dalam memenuhi keperluan permintaan matawang asing, daripada residen dan bukan residen, yang bukan hanya untuk pembayaran perdagangan tetapi juga untuk pembayaran perkhidmatan, pelaburan dan pembayaran lain.

Sumber IMF – IMF mengekalkan sumber kewangan yang besar bagi membiayai ketidakseimbangan sementara Imbangan Pembayaran atau kedudukan rizab negara ahlinya. Sumber ini bersifat pusingan dan ia diwujudkan daripada matawang negara ahli sebagai kuota langganan. IMF boleh menambahkan sumber tersebut melalui pinjaman.

### 8. Kesilapan dan Ketinggalan Bersih

Kesilapan dan ketinggalan bersih berlaku disebabkan terkurang atau terlebih anggaran pada setiap item dalam BOP. Perbezaan terjadi berikutan penggunaan pelbagai sumber data dalam penyusunan, perbezaan masa perekodan dan faktor penilaian harga (keuntungan atau kerugian atas tukaran wang asing).

### C. SUMBER DATA

Penyusunan Anggaran Imbangan Pembayaran menggunakan sumber data berikut:

## EXPLANATORY NOTES

### A. INTRODUCTION

Malaysia's Balance of Payments statistics measure the international economic transactions between Malaysia and the rest of the world in terms of magnitude and types of transactions in current, capital, and financial accounts. The compilation is in accordance with the methodology set forth in the Sixth Edition of the Balance of Payments Manual (BPM6) of the International Monetary Fund (IMF).

### B. CONCEPT AND COVERAGE

#### 1. Resident

A resident is:

- a person who has stayed or lived in Malaysia for at least one year; and
- a company or institution located/operating in Malaysia where its centre of predominant economic interest is in Malaysia.

Centre of predominant economic interest of an institutional unit in a economic territory existed where some location, dwelling, place of production or other premises on which or from which the unit engages and intends to continue engaging, either indefinitely or over a finite but long period of time, in economic activities and transactions on a significant scale.

#### 2. Non-Resident

A non-resident refers to a person, company or institution that lives in, or is located/operating in a country outside Malaysia.

Residency status of foreign official representatives, international organizations, foreign students and medical patients, are as follows:

- foreign official representatives (embassies, consulates, military bases, foreign general government) in Malaysia are considered as extra-territorial and, therefore are treated as non-residents;
- Malaysia's official representatives abroad are treated as residents of Malaysia;
- international organisations are not considered as residents of any economy/country; and
- foreign students and foreign patients are treated as resident of their country of origin.

#### 3. Double Entry System

A system that follows the internationally accepted accounting principle of recording two equal entries for each transaction. Credit entries are used to record exports of goods and services, income receivable and financial transactions involving reductions in financial assets or increase in liabilities. Conversely, debit entries are used to record imports and services, income payable and financial transactions involving increase of assets or decrease in liabilities.

## EXPLANATORY NOTES

---

### 4. Current Account

It measures net provision of real resources namely goods, services, primary and secondary income to or from the rest of the world. A surplus in current account arises when earnings exceed spending, while a deficit occurs when it reversed. A deficit in the current account may be financed by foreign investment inflows or external borrowings or a draw downs on reserve assets.

#### i. Goods

All transactions of goods that involved change of ownership between residents and non-residents are covered. The goods are valued at their market price. Goods covers general merchandise, goods for processing, net export of goods under merchanting, and nonmonetary gold.

Distributive services in connection with goods that are performed up to the customs frontier included in merchandise. Those distributive services that are performed beyond that frontier by local carrier are classified as exports of freight.

The change of ownership rule adopted for defining merchandise ensures in principle that the component is consistent as to coverage and timing with other components in the balance of payments. However, the international standards for trade statistics are based on physical movements of goods across the customs frontier.

Generally, the change of ownership of most goods occurs at the same time when it physically moves across the frontier.

A convenient proxy for the market value at Malaysia's customs frontier is the f.o.b. value on exports reported to Customs by exporters and the c.i.f. on imports reported by importers.

- Exports f.o.b. refer to the value of the goods in the market at the statistical/customs frontier, including all costs of transporting the goods to the statistical/customs frontier, export and other duties payable as well as the cost of loading the goods onto the carrier unless the latter cost is borne by the carrier.
- Imports c.i.f. refer to the value of the goods in the market at the statistical/customs frontier, including all charges for transport and insurance whilst in transit but excluding the cost of unloading from the ship, aircraft or vehicle, unless it is borne by the carrier. The c.i.f. value is adjusted to f.o.b. valuation for the compilation of balance of payments statistics.

The value of goods as obtained from customs declarations (trade statistics) is adjusted for coverage to include transactions of commercial ships and aircrafts, which are delivered outside Malaysia, import of military goods and exports/imports of water to/from Singapore. On the other hand, the exclusion of exports/imports for which no change of ownership includes returned goods (such goods were imported earlier, but were subsequently returned because of defects or did not meet certain specifications) and second-hand vehicles exported/imported for personal use.

## EXPLANATORY NOTES

---

The balance on goods is differ between the external trade and BOP statistics because of:

- imports are recorded in c.i.f. in external trade statistics; and
- goods are adjusted for coverage and timing for change of ownership in BOP.

Merchanting is defined as purchase of goods by a resident from a non-resident and the subsequent resale to another non-resident without the goods being present in Malaysia. The difference between the purchase and resale values of the goods is recorded as net export of goods under merchanting.

### ii. Services

Services are the result of a production activity that changes the conditions of the consuming units, or facilitates the exchange of products or financial assets. Services are not generally separate items over which ownership rights can be established and cannot generally be separated from their production.

#### a. Maintenance and Repair Services n.i.e.

-

## EXPLANATORY NOTES

---

- (b) Transport of goods is always considered to begin at the customs frontier of the exporting country. The main purpose of specifying a convention is to provide a basis for recording the transport of goods, consistent with a uniform free on board (f.o.b.) valuation basis for the goods component. The procedures for compilation are as follows:
- to enter as exports all services performed by residents on Malaysia's/other countries' exports, once these have been loaded on board the carrier at the customs frontier of Malaysia/other countries from which the goods are being exported; and
  - to enter as imports all services performed by foreign residents on Malaysia's imports, once these have been loaded on board the carrier at the customs frontier of the country from which they are imported.
- (c) Freight payments to non-resident shipping and airline companies for services rendered in connection with Malaysia's imports. Freight earnings by resident carriers for the carriage of Malaysia's imports are excluded based on the underlying conventional assumption that all freight expenses incurred on imports are borne by residents.

### **(ii) Passenger Services**

- (a) Passenger services relates to the service performed in the international transport of people. Other services for which passengers make expenditures on board carriers or for which they pay charges to carriers, such as those for excess baggage or other personal accompanying effects are also included.
- (b) In order to avoid practical difficulties in determining the residency of passengers, the convention is adopted whereby passenger fares sold within Malaysia are deemed to be sold to residents. Likewise, passenger fares sold in foreign countries are deemed to be sold to non-residents.

### **(iii) Other Transport Services**

- (a) Port and airport services relating to the procurement of services by shippers/carriers for consumption in their operations are captured here. The services include stevedoring, airport and harbour fees, pilotage, towage, maintenance and repair.

“Foreigners travelling to Malaysia for any reason other than following an activity remunerated from within Malaysia and stayed for at least a night but not exceeding one year”; and

- **Excursionists**

### **iv. Secondary Income**

In the case of resources being provided by non-residents to residents, offsetting transfer credits are required and vice versa when residents provide resources to non-residents.

Since unrequited transfers are defined to be offsetting entries for the provision of real resources or financial items without a quid pro quo, the value of the unrequited transfers has to be the same as that of the real and financial resources to which the unrequited transfers are offsets. Thus, a surplus may be reflected in investments abroad or overseas lending or accumulation of reserve assets.

## EXPLANATORY NOTES

---

Foreign financial assets and their matching liabilities are claims by resident of one economy upon a resident of another economy. The existence of such claims, therefore, generally will be recorded on two balance sheets, namely the balance sheet of the transactor against which the claims are held as liabilities, and the balance sheet at of the holder of the claims who will record the transactions as assets.

### **i. Direct Investment**

Direct investment is a category of international investment that reflects the objective of a resident entity in one economy obtaining a lasting interest in an enterprise resident in another economy. The lasting interest implies the existence of a long-term relationship between the direct investor and the enterprise and a significant degree of influence on the management of the enterprise. An ownership of at least 10 per cent of the voting power of the enterprise is evidence of such relationship. Direct investment covers all transactions between direct investors and direct investment enterprises within the Foreign Direct Investment Relationship (FDIR). Financial instruments covered under direct investment include equity, reinvestment of earnings and debt instruments (such as inter-company loans and advances, trade credits).

- IMF Reserve Position - The reserve position of Malaysia with the IMF, defined in terms of SDR, reflects transactions with the IMF during the period. When the IMF makes its resources available to Malaysia, it does so by allowing Malaysia to purchase SDR or other members' currencies in exchange for the Ringgit. Purchases (or drawings) of other member's currencies from the IMF by Malaysia would result in a decline in its reserve position with the IMF while repurchases (or repayments) would have the opposite effect.
- Gold & Foreign Exchange - Gold holdings refer to monetary gold held by BNM. Foreign exchange reserves are held mainly in the denomination of the major currencies which are used for the settlement of trade. These reserves are required to meet the demands for foreign currencies, from both residents and non-residents, not only for trade settlements but for services, investment and other payments.
- IMF Resources - The IMF maintains a large pool of resources from which to help finance temporary imbalances in the Balance of Payments or reserve position of its members. These resources are of a revolving character and are primarily derived from currencies made available by members as their quota subscriptions. The IMF may supplement these resources by borrowing.
- 8. Net Errors and Omissions** Net error & omissions arises from under or over estimation of each item in BOP. Discrepancies occur due to various data sources used in compilation, different time of recording and valuation factors (gains or losses on exchange rates).
