NOTA TEKNIKAL
TECHNICAL NOTES

NOTA TEKNIKAL

A. PENGENALAN

Statistik Imbangan Pembayaran Malaysia mengukur transaksi ekonomi antarabangsa antara Malaysia dan negara-negara lain di dunia dari segi magnitud dan jenis transaksi dalam akaun semasa, akaun modal dan akaun kewangan. Penyusunan ini selaras dengan metodologi yang ditetapkan dalam Manual Imbangan Pembayaran dan Kedudukan Pelaburan Antarabangsa Edisi Keenam (BPM6) oleh Tabung Kewangan Antarabangsa (IMF).

B. KONSEP DAN LIPUTAN

1. Residen

Residen ialah:

- orang yang tinggal atau menetap di Malaysia bagi tempoh sekurang-kurangnya satu tahun; dan
- syarikat atau institusi yang berada/beroperasi di Malaysia di mana kepentingan ekonominya berpusat di Malaysia.

Satu unit institusi dikatakan mempunyai pusat kepentingan di wilayah ekonomi di sebuah negara apabila wujudnya lokasi seperti bangunan, tempat pengeluaran, atau premis lain dimana atau dari mana unit tersebut mengusahakan atau bercadang untuk terus mengusahakan, sama ada untuk tempoh selama-lamanya atau tempoh yang panjang, di dalam aktiviti ekonomi dan dengan skala urusniaga yang signifikan.

2. Bukan Residen

Bukan residen merujuk kepada individu, syarikat atau institusi yang tinggal, atau berada/beroperasi di negara luar Malaysia.

Status residen perwakilan kerajaan asing, organisasi antarabangsa, pelajar asing dan pesakit asing, adalah seperti berikut:

- perwakilan kerajaan asing (kedutaan, konsulat, pangkalan ketenteraan, kerajaan asing) di Malaysia ada dianggap sebagai pihak luar-wilayah dan, dengan itu dianggap sebagai bukan-residen;
- perwakilan kerajaan Malaysia di luar negeri dianggap sebagai residen Malaysia;
- organisasi antarabangsa tidak dianggap sebagai residen bagi mana-mana ekonomi/negara; dan
- pelajar asing dan pesakit asing dianggap sebagai residen negara asal mereka.

3. Sistem Catatan Beregu

Sistem ini berdasarkan prinsip perakaunan yang diterima di peringkat antarabangsa bagi merekodkan dua kemasukan yang sama bagi setiap urusniaga. Kemasukan kredit untuk merekodkan eksport barang dan perkhidmatan, pendapatan diterima dan urusniaga kewangan yang melibatkan pengurangan dalam aset kewangan atau meningkatkan liabiliti. Sebaliknya, kemasukan debit adalah digunakan untuk merekodkan import barang dan perkhidmatan, pendapatan yang akan dibayar dan urusniaga kewangan yang melibatkan peningkatan dalam aset atau pengurangan dalam liabiliti.

NOTA TEKNIKAL

4. Akaun Semasa

Ia mengukur peruntukan bersih sumber sebenar iaitu barang, perkhidmatan, pendapatan primer dan sekunder kepada atau daripada seluruh dunia. Lebihan dalam akaun berlaku apabila pendapatan melebihi perbelanjaan, manakala defisit berlaku jika ia sebaliknya. Defisit dalam akaun semasa mungkin dibiayai oleh aliran masuk pelaburan asing atau pinjaman luar negara atau penggunaan dalam aset rizab.

i. Barang

Semua urusniaga barang yang melibatkan pertukaran hak milik di antara residen dan bukan-residen adalah diliputi. Barang dinilai berdasarkan harga pasaran.

Perkhidmatan penghantaran barang sehingga ke sempadan kastam termasuk dalam barang. Perkhidmatan penghantaran yang disediakan melepas sempadan kastam oleh pengangkut tempatan adalah dikelaskan sebagai tambang muatan eksport.

Peraturan pertukaran hak milik digunakan dalam mendefiniskan dagangan bagi memastikan pada prinsipnya komponen tersebut adalah konsisten dalam liputan dan selaras dengan komponen-komponen lain dalam imbalan pembayaran. Walau bagaimanapun, standard antarabangsa digunakan bagi perangkaan perdagangan luar negeri berdasarkan kepada pergerakan fizikal barang merentasi sempadan kastam.

Secara umumnya, pertukaran hak milik bagi kebanyakan barang berlaku pada masa yang sama apabila ia secara fizikalnya bergerak melepas sempadan.

Proksi nilai pasaran di sempadan kastam Malaysia bagi barang eksport yang dilaporkan kepada pihak kastam ialah nilai f.o.b. dan nilai c.i.f. bagi barang import.

- Eksport f.o.b merujuk kepada nilai barang di pasaran di sempadan perangkaan/kastam, iaitu termasuk semua kos pengangkutan barang ke sempadan perangkaan/kastam, eksport dan duti lain yang kena bayar, dan juga kos punggahan ke kenderaan pengangkut melainkan kos ditanggung sendiri oleh syarikat pengangkut.
- Import c.i.f. merujuk kepada nilai barang di pasaran sempadan perangkaan/kastam, iaitu termasuk semua caj pengangkutan dan insurans ketika dalam perjalanan tetapi tidak termasuk kos punggahan daripada kapal, kapal terbang atau kenderaan, melainkan kos sedemikian ditanggung sendiri oleh syarikat pengangkut tersebut. Nilai c.i.f. dibuat penyesuaian kepada nilai f.o.b. dalam penyusunan perangkaan imbalan pembayaran.

Nilai barang yang diperolehi daripada pengisytiharan kastam (perangkaan perdagangan luar negeri) diselaraskan untuk liputan yang merangkumi urusniaga pesawat udara dan kapal komersil, yang dihantar ke luar Malaysia, import barang ketenteraan dan eksport/import air ke/dari Singapura. Sebaliknya, pengecualian bagi eksport/import yang tidak berlaku pertukaran hak milik termasuklah barang yang dikembalikan (barang ini telah diimport dan dikembalikan semula kerana didapati rosak atau tidak menepati spesifikasi) dan kenderaan terpakai yang dieksport/diimport untuk kegunaan persendirian.

NOTA TEKNIKAL

Imbangan barang adalah berbeza dengan perdagangan luar negeri dan perangkaan BOP kerana:

- import direkodkan pada c.i.f. bagi perangkaan perdagangan luar negeri; dan
- liputan dan masa berlaku pertukaran hak milik barang disesuaikan dalam BOP.

Merchanting ditakrifkan sebagai pembelian barang oleh residen daripada bukan-residen dan menjual semula kepada bukan-residen lain tanpa barang tersebut perlu memasuki Malaysia. Perbezaan antara nilai pembelian dan jualan semula barang direkodkan sebagai eksport bersih barang di bawah merchanting.

ii. Perkhidmatan

Perkhidmatan adalah hasil daripada aktiviti pengeluaran yang melibatkan perubahan keadaan unit pengeluaran, atau memenuhi pertukaran produk atau aset kewangan. Perkhidmatan bukan secara umum dipisahkan kepada item dimana hak milik boleh diwujudkan dan tidak boleh secara umum dipisahkan daripada pengeluaran mereka.

a. Perkhidmatan Penyenggaraan dan Pembaikan t.t.t.l.

Termasuk penyenggaraan dan kerja pembaikan oleh residen ke atas barang yang dimiliki oleh bukan residen (dan sebaliknya).

Kerja pembaikan mungkin dilakukan di tempat pembaikan atau di tempat lain. Penyenggaraan dan pembaikan bagi kapal, pesawat dan kelengkapan pengangkutan lain juga termasuk.

Tidak termasuk:

- Pembersihan peralatan pengangkutan (termasuk dalam perkhidmatan pengangkutan);
- Pembaikan pembinaan dan penyenggaraan (termasuk dalam pembinaan); dan
- Penyenggaraan dan pembaikan komputer (termasuk dalam perkhidmatan komputer).

b. Pengangkutan

Pengangkutan meliputi semua jenis pengangkutan iaitu laut, udara, dan lain-lain (termasuk darat, jalan air, angkasa lepas dan saluran paip) dan perkhidmatan pos dan kurier. Ia melibatkan pengangkutan penumpang, tambang (pergerakan barang) dan aktiviti perkhidmatan sokongan dan tambahan. Aktiviti perkhidmatan sokongan dan tambahan tidak termasuk sewaan (charter) pengangkut tanpa anak kapal dimasukkan dalam perkhidmatan perniagaan lain.

(i) Perkhidmatan Tambang Muatan

(a) Item ini meliputi pengangkutan dan perkhidmatan pengagihan yang dilakukan oleh:

- residen ke atas barang dan kebanyakan barang alih lain yang diperolehi atau dimiliki oleh bukan residen (eksport bagi Malaysia); dan

NOTA TEKNIKAL

- bukan-residen ke atas barang dan kebanyakan barang alih lain yang diperoleh atau dimiliki oleh residen (import bagi Malaysia). Insurans atas barang import Malaysia juga diliputi disini.
- (b) Penghantaran barang biasanya ditetapkan bermula di sempadan kastam negara pengeksport. Ini dibuat sebagai asas dalam pengiraan penghantaran barang dan supaya ianya konsisten dengan penilaian f.o.b. bagi komponen barang. Prosedur penyusunan adalah seperti berikut:
- dikira sebagai eksport semua perkhidmatan yang dibekalkan oleh residen Malaysia/negara lain ke atas eksport, sebaik sahaja barang eksport tersebut dimuatkan ke kapal/pesawat udara di sempadan Malaysia/negara lain dari tempat dimana barang di eksport; dan
 - dikira sebagai import semua perkhidmatan yang dibekalkan oleh residen asing ke atas import Malaysia, sebaik sahaja barang tersebut dimuatkan ke kapal/ pesawat udara di sempadan kastam negara pengeksport.
- (c) Bayaran tambang muatan kepada syarikat perkапalan dan penerangan bukan-residen atas perkhidmatan yang diterima berkaitan barang import Malaysia. Pendapatan tambang muatan yang diterima oleh syarikat residen kerana perkhidmatan pengangkutan barang import Malaysia tidak diambil kira berdasarkan andaian semua perbelanjaan tambang muatan bagi import adalah ditanggung oleh residen.

(ii) Perkhidmatan Pengangkutan Penumpang

- (a) Perkhidmatan ini merujuk kepada pengangkutan penumpang di peringkat antarabangsa. Perkhidmatan lain yang membabitkan perbelanjaan penumpang yang menaiki kapal/pesawat udara, bayaran kerana lebihan bagasi dan barang persendirian yang dibawa bersama juga diambil kira.
- (b) Untuk mengelakkan kesulitan dalam menentukan taraf residen penumpang, satu ketetapan telah dibuat dimana tiket penumpang yang dijual di Malaysia disifatkan sebagai dijual kepada residen. Sebaliknya, tiket penumpang yang dijual di negara asing disifatkan sebagai dijual kepada bukan residen.

(iii) Perkhidmatan Pengangkutan Lain

- (a) Bayaran bagi perkhidmatan di pelabuhan atau di lapangan terbang oleh syarikat pengangkut direkodkan disini. Perkhidmatan tersebut termasuklah perkhidmatan pemunggahan kargo, perkhidmatan lapangan terbang/ pelabuhan, pengemudian, penundaan, penyenggaraan dan pembaikan.

NOTA TEKNIKAL

- (b) Perkhidmatan lain yang berkaitan dijalankan oleh shippers/carriers dan peralatan yang setara seperti bot tunda, kapal tunda dan operasi menyelamat juga membentuk sebahagian daripada komponen ini.

(iv) Perkhidmatan Pos dan Kurier

Perkhidmatan pos dan kurier meliputi pengambilan, pengangkutan dan penghantaran bungkusan, pakej, dan dokumen bercetak lain. Ia tidak termasuk bayaran kepada entiti perkhidmatan pos, seperti portal giro, perkhidmatan akaun simpanan dan perbankan, dan caj penyimpanan barang.

c. Perjalanan

- (i) Item ini merujuk kepada barang dan perkhidmatan seperti penginapan, makanan, hiburan, pengangkutan domestik, hadiah dan cenderamata yang diperoleh oleh pelawat asing ketika berada di Malaysia, dan yang diperoleh oleh pelawat Malaysia ketika berada di negara asing. Perbelanjaan oleh anak kapal juga diambilkira. Pengangkutan antarabangsa pelawat direkodkan di bawah perkhidmatan pengangkutan.
- (ii) Kedua-dua jenis pelawat iaitu pelancong dan pelawat harian adalah termasuk dalam penyusunan ini. Lembaga Penggalakan Pelancongan Malaysia mendefinisikan pelancong dan pelawat harian seperti berikut:

• Pelancong

“Warga asing yang melawat Malaysia bukan untuk tujuan bekerja di Malaysia, dan tinggal sekurang-kurangnya satu malam tetapi tidak melebihi satu tahun”; dan

• Pelawat Harian

“Warga asing yang melawat Malaysia bukan untuk tujuan bekerja di Malaysia, dan tinggal kurang daripada 24 jam dan tidak bermalam”.

- (iii) Pelancong dikelaskan di bawah perjalanan perniagaan dan perjalanan persendirian. Perjalanan perniagaan meliputi pelancong yang ke luar negeri untuk semua jenis aktiviti perniagaan: anak kapal; pegawai kerajaan dalam perjalanan rasmi. Perjalanan persendirian meliputi pelancong yang ke luar negeri bagi tujuan selain daripada perniagaan seperti lawatan, bercuti, menyertai aktiviti rekreasi dan kebudayaan atau mengerjakan Haji atau Umrah/ziarah.
- (iv) Komponen Perjalanan juga termasuk perbelanjaan pelajar Malaysia di luar negeri dan perbelanjaan pelajar asing di Malaysia. Pelajar kekal sebagai residen di negara asal tanpa mengambilkira tempoh tinggal di negara lain.
- (v) Perbelanjaan kesihatan/perubatan bagi kredit dan debit juga diambilkira sebagai perjalanan. Perbelanjaan yang ditanggung oleh pesakit bukan residen di Malaysia (kredit) atau residen Malaysia yang mendapatkan rawatan perubatan di luar negara (debit) juga termasuk dalam kategori ini.

Pendapatan Pelaburan Langsung terdiri daripada:

- dividen, iaitu agihan keuntungan atas pemilikan ekuiti enterpris pelaburan langsung;
- remit keuntungan cawangan;
- perolehan dilabur semula, iaitu merujuk kepada perolehan saham langsung pelabur ke atas DIE yang tidak diagihkan. Keuntungan/kerugian saham langsung pelabur yang tidak diagihkan adalah dilihat sebagai penyediaan modal tambahan kepada enterpris; dan

Pendapatan sekunder adalah diklasifikasikan kepada dua kategori standard utama: kerajaan dan sektor lain yang meliputi pindahan peribadi dan pindahan semasa lain secara tunai (cth. pencen, denda, cukai, hadiah yang dimenangi dari loteri) atau bentuk barang (cth. hadiah makanan, bekalan perubatan, pakaian).

Jika bukan residen membekalkan sumber kepada residen, item pengimbang kredit diperlukan dan jika sebaliknya, item pengimbang debit diperlukan.

Oleh kerana pindahan berperanan sebagai item pengimbang kepada sumber atau item kewangan yang dibekalkan tanpa balasan, maka nilainya haruslah bersamaan dengan nilai sebenar sumber atau item kewangan yang dibekalkan itu. Pada prinsipnya, pindahan dicatatkan pada ketika sumber yang diimbanginya bertukar milik.

NOTA TEKNIKAL

Oleh itu, lebihan mungkin dicerminkan oleh pelaburan luar negeri atau pemberian pinjaman ke luar negeri atau pengumpulan aset rizab.

Aset kewangan asing dan liabiliti tanggungan adalah tuntutan oleh residen kepada satu ekonomi terhadap residen ekonomi lain. Kewujudan tuntutan tersebut, walau bagaimanapun, secara umumnya akan direkodkan di dua lembaran imbangan, iaitu lembaran imbangan penghantar dimana tuntutan terhadapnya diadakan sebagai liabiliti, dan lembaran imbangan kepada pemegang tuntutan yang akan merekodkan urusniaga sebagai aset.

SDR – SDR ialah aset yang diwujudkan oleh IMF untuk memenuhi keperluan global apabila ia diperlukan. Ia diwujudkan sebagai tambahan kepada aset rizab yang sedia ada.
	Kedudukan Rizab IMF – Kedudukan rizab Malaysia di IMF dirujuk dalam terma SDR, yang mencerminkan urusniaga dengan IMF dalam suatu tempoh. IMF akan membernarkan Malaysia untuk membeli SDR atau matawang negara lain sebagai pertukaran kepada Ringgit. Pembelian (atau pengeluaran) matawang negara lain daripada IMF menyebabkan kedudukan rizab Malaysia di IMF akan berkurangan sebaliknya penjualan semula (pembayaran balik) akan menyebabkan kesan sebaliknya.
	Emas & Tukaran Asing – Pegangan emas merujuk kepada emas monetari yang dipegang oleh BNM. Rizab pertukaran asing yang dipegang biasanya dalam bentuk mata wang utama digunakan untuk tujuan bayaran perdagangan. Rizab ini juga diperlukan dalam memenuhi keperluan permintaan matawang asing, daripada residen dan bukan residen, yang bukan hanya untuk pembayaran perdagangan tetapi juga untuk pembayaran perkhidmatan, pelaburan dan pembayaran lain.
	Sumber IMF – IMF mengekalkan sumber kewangan yang besar bagi membayai ketidakseimbangan sementara Imbangian Pembayaran atau kedudukan rizab negara ahlinya. Sumber ini bersifat pusingan dan ia diwujudkan daripada matawang negara ahli sebagai kuota langganan. IMF boleh menambahkan sumber tersebut melalui pinjaman.
8. Kesilapan dan Ketinggalan Bersih	Kesilapan dan ketinggalan bersih berlaku disebabkan terkurang atau terlebih anggaran pada setiap item dalam BOP. Perbezaan terjadi berikutan penggunaan pelbagai sumber data dalam penyusunan, perbezaan masa perekodan dan faktor penilaian harga (keuntungan atau kerugian atas tukaran wang asing).

TECHNICAL NOTES

A. INTRODUCTION

Malaysia's Balance of Payments statistics measure the international economic transactions between Malaysia and the rest of the world in terms of magnitude and types of transactions in current, capital, and financial accounts. The compilation is in accordance with the methodology set forth in the Sixth Edition of the Balance of Payments and International Investment Position Manual (BPM6) of the International Monetary Fund (IMF).

B. CONCEPT AND COVERAGE

1. Resident

A resident is:

- a person who has stayed or lived in Malaysia for at least one year; and
- a company or institution located/operating in Malaysia where its centre of predominant economic interest is in Malaysia.

Centre of predominant economic interest of an institutional unit in a economic territory existed where some location, dwelling, place of production or other premises on which or from which the unit engages and intends to continue engaging, either indefinitely or over a finite but long period of time, in economic activities and transactions on a significant scale.

2. Non-Resident

A non-resident refers to a person, company or institution that lives in, or is located/operating in a country outside Malaysia.

Residency status of foreign official representatives, international organizations, foreign students and medical patients, are as follows:

- foreign official representatives (embassies, consulates, military bases, foreign general government) in Malaysia are considered as extra-territorial and, therefore are treated as non-residents;
- Malaysia's official representatives abroad are treated as residents of Malaysia;
- international organisations are not considered as residents of any economy/country; and
- foreign students and foreign patients are treated as resident of their country of origin.

3. Double Entry System

A system that follows the internationally accepted accounting principle of recording two equal entries for each transaction. Credit entries are used to record exports of goods and services, income receivable and financial transactions involving reductions in financial assets or increase in liabilities. Conversely, debit entries are used to record imports and services, income payable and financial transactions involving increase of assets or decrease in liabilities.

TECHNICAL NOTES

4. Current Account

It measures net provision of real resources namely goods, services, primary and secondary income to or from the rest of the world. A surplus in current account arises when earnings exceed spending, while a deficit occurs when it reversed. A deficit in the current account may be financed by foreign investment inflows or external borrowings or a draw downs on reserve assets.

i. Goods

All transactions of goods that involved change of ownership between residents and non-residents are covered. The goods are valued at their market price. Goods covers general merchandise, goods for processing, net export of goods under merchanting, and nonmonetary gold.

Distributive services in connection with goods that are performed up to the customs frontier included in merchandise. Those distributive services that are performed beyond that frontier by local carrier are classified as exports of freight.

The change of ownership rule adopted for defining merchandise ensures in principle that the component is consistent as to coverage and timing with other components in the balance of payments. However, the international standards for trade statistics are based on physical movements of goods across the customs frontier.

Generally, the change of ownership of most goods occurs at the same time when it physically moves across the frontier.

A convenient proxy for the market value at Malaysia's customs frontier is the f.o.b. value on exports reported to Customs by exporters and the c.i.f. on imports reported by importers.

- Exports f.o.b. refer to the value of the goods in the market at the statistical/customs frontier, including all costs of transporting the goods to the statistical/customs frontier, export and other duties payable as well as the cost of loading the goods onto the carrier unless the latter cost is borne by the carrier.
- Imports c.i.f. refer to the value of the goods in the market at the statistical/customs frontier, including all charges for transport and insurance whilst in transit but excluding the cost of unloading from the ship, aircraft or vehicle, unless it is borne by the carrier. The c.i.f. value is adjusted to f.o.b. valuation for the compilation of balance of payments statistics.

The value of goods as obtained from customs declarations (trade statistics) is adjusted for coverage to include transactions of commercial ships and aircrafts, which are delivered outside Malaysia, import of military goods and exports/imports of water to/from Singapore. On the other hand, the exclusion of exports/imports for which no change of ownership includes returned goods (such goods were imported earlier, but were subsequently returned because of defects or did not meet certain specifications) and second-hand vehicles exported/imported for personal use.

TECHNICAL NOTES

The balance on goods is differ between the external trade and BOP statistics because of:

- imports are recorded in c.i.f. in external trade statistics; and
- goods are adjusted for coverage and timing for change of ownership in BOP.

Merchanting is defined as purchase of goods by a resident from a non-resident and the subsequent resale to another non-resident without the goods being present in Malaysia. The difference between the purchase and resale values of the goods is recorded as net export of goods under merchanting.

ii. Services

Services are the result of a production activity that changes the conditions of the consuming units, or facilitates the exchange of products or financial assets. Services are not generally separate items over which ownership rights can be established and cannot generally be separated from their production.

TECHNICAL NOTES

- (b) Transport of goods is always considered to begin at the customs frontier of the exporting country. The main purpose of specifying a convention is to provide a basis for recording the transport of goods, consistent with a uniform free on board (f.o.b.) valuation basis for the goods component. The procedures for compilation are as follows:
- to enter as exports all services performed by residents on Malaysia's/other countries' exports, once these have been loaded on board the carrier at the customs frontier of Malaysia/other countries from which the goods are being exported; and
 - to enter as imports all services performed by foreign residents on Malaysia's imports, once these have been loaded on board the carrier at the customs frontier of the country from which they are imported.
- (c) Freight payments to non-resident shipping and airline companies for services rendered in connection with Malaysia's imports. Freight earnings by resident carriers for the carriage of Malaysia's imports are excluded based on the underlying conventional assumption that all freight expenses incurred on imports are borne by residents.

(ii) Passenger Services

- (a) Passenger services relates to the service performed in the international transport of people. Other services for which passengers make expenditures on board carriers or for which they pay charges to carriers, such as those for excess baggage or other personal accompanying effects are also included.
- (b) In order to avoid practical difficulties in determining the residency of passengers, the convention is adopted whereby passenger fares sold within Malaysia are deemed to be sold to residents. Likewise, passenger fares sold in foreign countries are deemed to be sold to non-residents.

(iii) Other Transport Services

- (a) Port and airport services relating to the procurement of services by shippers/carriers for consumption in their operations are captured here. The services include stevedoring, airport and harbour fees, pilotage, towage, maintenance and repair.

Expenditure by ships/carriers crews are also taken into account. The international carriage of visitors is recorded under transport services.
- (ii) Both types of visitors namely tourists and excursionists are included in the compilation. The Malaysia Tourism Promotion Board defines tourists and excursionists as follows:
 - **Tourists**
“Foreigners travelling to Malaysia for any reason other than following an activity remunerated from within Malaysia and stayed for at least a night but not exceeding one year”; and
 - **Excursionists**
“Foreigners travelling to Malaysia for any reason other than following an activity remunerated from within Malaysia and stayed less than 24 hours without an overnight stay”.

- (vi) Health-related expenditure for both credit and debit are also part of travel. This expenditure incurred by non-resident patients in Malaysia (credit) or Malaysian residents seeking medical treatment abroad (debit) are included in this category.

d. Construction

Construction services cover both new and repair work and are performed for a short time period, less than one year. Construction is valued on a gross basis inclusive of all goods and services used as input to the work and other cost of production. This relates to site preparation work, construction and completion work for buildings (painting, plumbing, demolition, etc.), construction work for civil engineering, installation of machinery and assembly work and other construction (such as renting services of construction or demolition equipment with operator; exterior cleaning work of building, etc.)

Secondary income are classified into two main standard categories: general government and other sectors which covers personal transfers and other current transfers in cash (e.g. pension, fines, taxes, prizes won from lotteries) or in kind (e.g. gifts of foods, medical supplies, clothing).

In the case of resources being provided by non-residents to residents, offsetting transfer credits are required and vice versa when residents provide resources to non-residents.

Since unrequited transfers are defined to be offsetting entries for the provision of real resources or financial items without a quid pro quo, the value of the unrequited transfers has to be the same as that of the real and financial resources to which the unrequited transfers are offsets. In principle, unrequited transfers are to be recorded at the same time when the resources to which they are offset, change ownership.

It is classified according to the functional categories namely direct investment, portfolio investment, financial derivatives, other investment and reserve assets. Financial account reflects how the surplus in the current account is utilized or how the deficit is financed. Thus, a surplus may be reflected in investments abroad or overseas lending or accumulation of reserve assets.

TECHNICAL NOTES

Foreign financial assets and their matching liabilities are claims by resident of one economy upon a resident of another economy. The existence of such claims, therefore, generally will be recorded on two balance sheets, namely the balance sheet of the transactor against which the claims are held as liabilities, and the balance sheet at of the holder of the claims who will record the transactions as assets.

i. Direct Investment

Direct investment is a category of international investment that reflects the objective of a resident entity in one economy obtaining a lasting interest in an enterprise resident in another economy. The lasting interest implies the existence of a long-term relationship between the direct investor and the enterprise and a significant degree of influence on the management of the enterprise. An ownership of at least 10 per cent of the voting power of the enterprise is evidence of such relationship. Direct investment covers all transactions between direct investors and direct investment enterprises within the Foreign Direct Investment Relationship (FDIR). Financial instruments covered under direct investment include equity, reinvestment of earnings and debt instruments (such as inter-company loans and advances, trade credits).

Under BPM6, direct investment is presented according to assets and liabilities basis. Asset refers to all investment abroad by both direct investors and direct investment enterprises in Malaysia, while liabilities refers to all investment in Malaysia by both direct investors and direct investment enterprises abroad.

Under BPM5, direct investment is presented according to directional principle basis. DIA is derived by netting off the assets of Malaysia's direct investors with its liabilities, while FDI is derived by netting off the liabilities of Malaysia's direct investment enterprises with its assets.

7. Reserve Assets	The reserve assets refer to BNM's claims against non-residents for meeting BOP needs. These assets comprise BNM's holdings of SDR, Malaysia's Reserve Position in the Fund, Gold & Foreign Exchange and IMF Resources. SDR - The SDR is an interest-bearing asset created by the IMF to meet global needs, as and when it arises. It was created as a supplement to existing reserve assets. IMF Reserve Position - The reserve position of Malaysia with the IMF, defined in terms of SDR, reflects transactions with the IMF during the period. When the IMF makes its resources available to Malaysia, it does so by allowing Malaysia to purchase SDR or other members' currencies in exchange for the Ringgit. Purchases (or drawings) of other member's currencies from the IMF by Malaysia would result in a decline in its reserve position with the IMF while repurchases (or repayments) would have the opposite effect.

TECHNICAL NOTES

Gold & Foreign Exchange - Gold holdings refer to monetary gold held by BNM. Foreign exchange reserves are held mainly in the denomination of the major currencies which are used for the settlement of trade. These reserves are required to meet the demands for foreign currencies, from both residents and non-residents, not only for trade settlements but for services, investment and other payments.

IMF Resources - The IMF maintains a large pool of resources from which to help finance temporary imbalances in the Balance of Payments or reserve position of its members. These resources are of a revolving character and are primarily derived from currencies made available by members as their quota subscriptions. The IMF may supplement these resources by borrowing.
